

**HENDRICKSON**

Specialists in custom-designed

**REFUSE REMOVAL TRUCKS**

when you want the **BEST...**

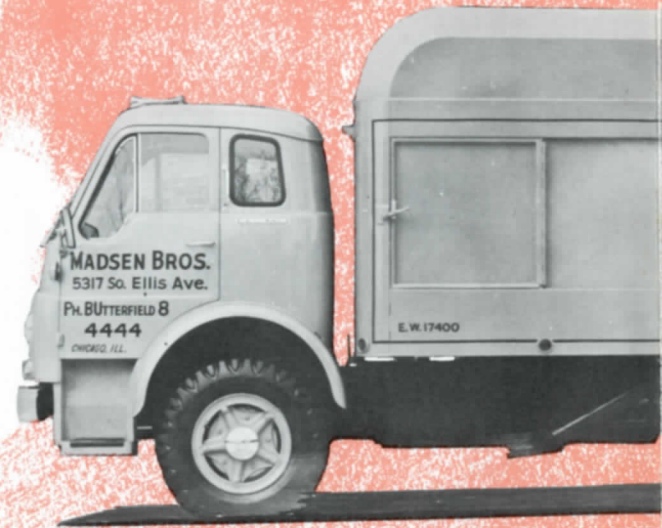

## Let **HENDRICKSON** design for your route!

Since different operators have different requirements, Hendrickson custom-designs each refuse removal unit for the route. A Hendrickson refuse removal truck is much more than a standard truck with a scavenger box or packer on it . . . Hendrickson custom-designs the truck, perfectly matching and balancing it to the scavenger to give you the best unit for your route. Our engineers recognize the requirements of a specialty vehicle that operates at least two shifts per day and has parts immediately available to meet your demands.

Specialized Hendrickson units are currently in service all across the country from Los Angeles to Boston. Owners and operators agree that, part-by-part, Hendrickson designs and builds the strongest truck on the road today. This reputation for quality and dependability comes from the fact that each Hendrickson custom-built truck is a one-purpose vehicle, designed to do a specific job.

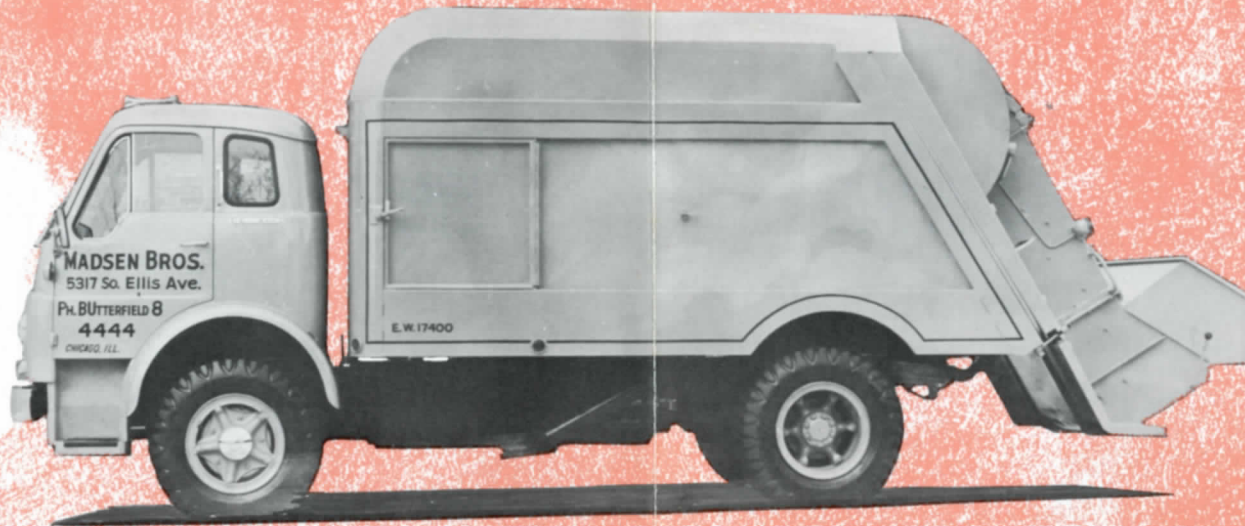

Dollar-for-dollar, a custom-built Hendrickson is the best buy for any application. Find out how Hendrickson can give you specialized safety, function and dependability at a conventional rig price.

**No matter what your operations . . . no matter  
what your application . . . call on Hendrickson,

You can depend on

to keep you on the route!

With most refuse removal trucks being operated two shifts per day, downtime is extremely costly. So, to keep your rigs out of the shop and on the road, Hendrickson offers day and night parts service. Carrying a complete line of new and rebuilt parts and components, most orders are shipped within a few hours of the time they are received.
