The Rendispos Garbage Body ...

is an all welded - all steel body fully reinforced, designed to handle all types of non-compressible materials such as Garbage, Ashes, Trade Waste, Sweepings, etc. Watertight and with top lid, it is ideal for handling wet garbage.

Hydraulic loading and unloading with simple uncluttered design, it will do the job with a minimum of expensive maintenance.

Container attachments are standard equipment - allowing the use of container if desired.

Planned for one man operation if required - the controls can be curbside or driver side.
