

**IN FIVE MINUTES,
BEMARS WILL TURN
YOUR BOX INTO
A 38 TON TRUCK.**

The Bemars Roll-Off Trucks and Trailers

Bemars Roll-Off Trucks and Trailers began life in the refuse industry. Rubbish men wanted larger containers that could be hauled away as fast as possible...without the expense of leaving a complete rubbish truck at a customer's facility.

The answer: leave an inexpensive box with the customer instead.

When the customer called, the rubbish man drove his truck carrying an empty box to the customer's. He rolled off the empty box. Then he rolled the full box up on hydraulically-raised rails, set it down on the truck, and took it off to the dump.

(Another Bemars product, the Stationary Compactor, was developed to compact the trash in the box and so lessen the number of hauls required.)

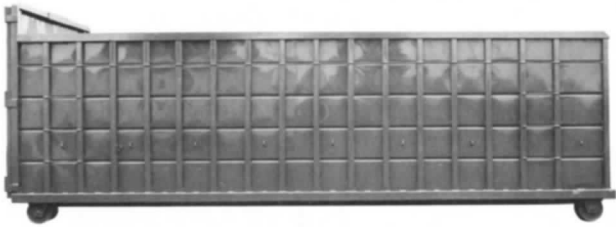

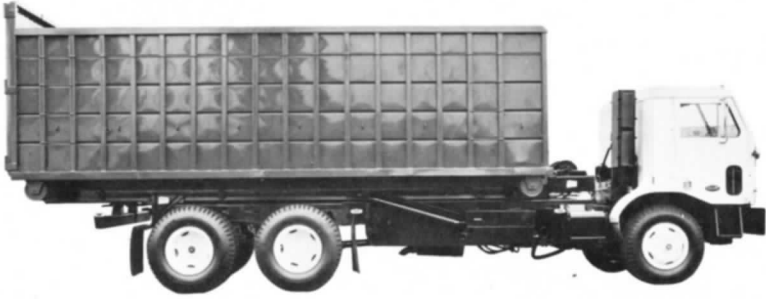

Today, Bemars still leads the industry in Roll-Off Trucks and Trailers. And they're

used not only in the refuse industry. New users are coming to light everyday. You can see more and more Bemars units in scrap metal yards, nurseries, tool cribs, demolition sites, construction sites, farms, cattle ranches...it's a long list. Bemars can now carry boxes eight to 24 feet long. We know your requirements are different from others, so we build our units to fit your particular needs. Our exclusive new, direct drive, high speed winch (optional) eliminates chains and sprockets and can pull up 60,000 pounds twice as fast as anyone else — all automatically without shifting.

Whether it's Roll-Off Trucks, Transfer Trailers or Semi-Trailers, Bemars builds them stronger and faster. So next time you want a truck around 24 hours a day, you'll only have to pay for it when it moves... if it's from Bemars — the roll-off people.

Now you see it...

...Now you don't...

...Now you see it again.

Roll-Off Trucks / King of the Road

The universal chassis that carries any type of payload up to 12 tons legal.

Specifications

Rails: 4" x 8" x 3/8" or 4" x 10" x 3/8" structural tubing

Hoist cylinders: 6" x 69"

Winch: Tulsa or Braden/Front or rear-mounted. 30,000 lb. continuous duty... 50,000 lb. stall
