

FRONT LOADING REFUSE PACKERS

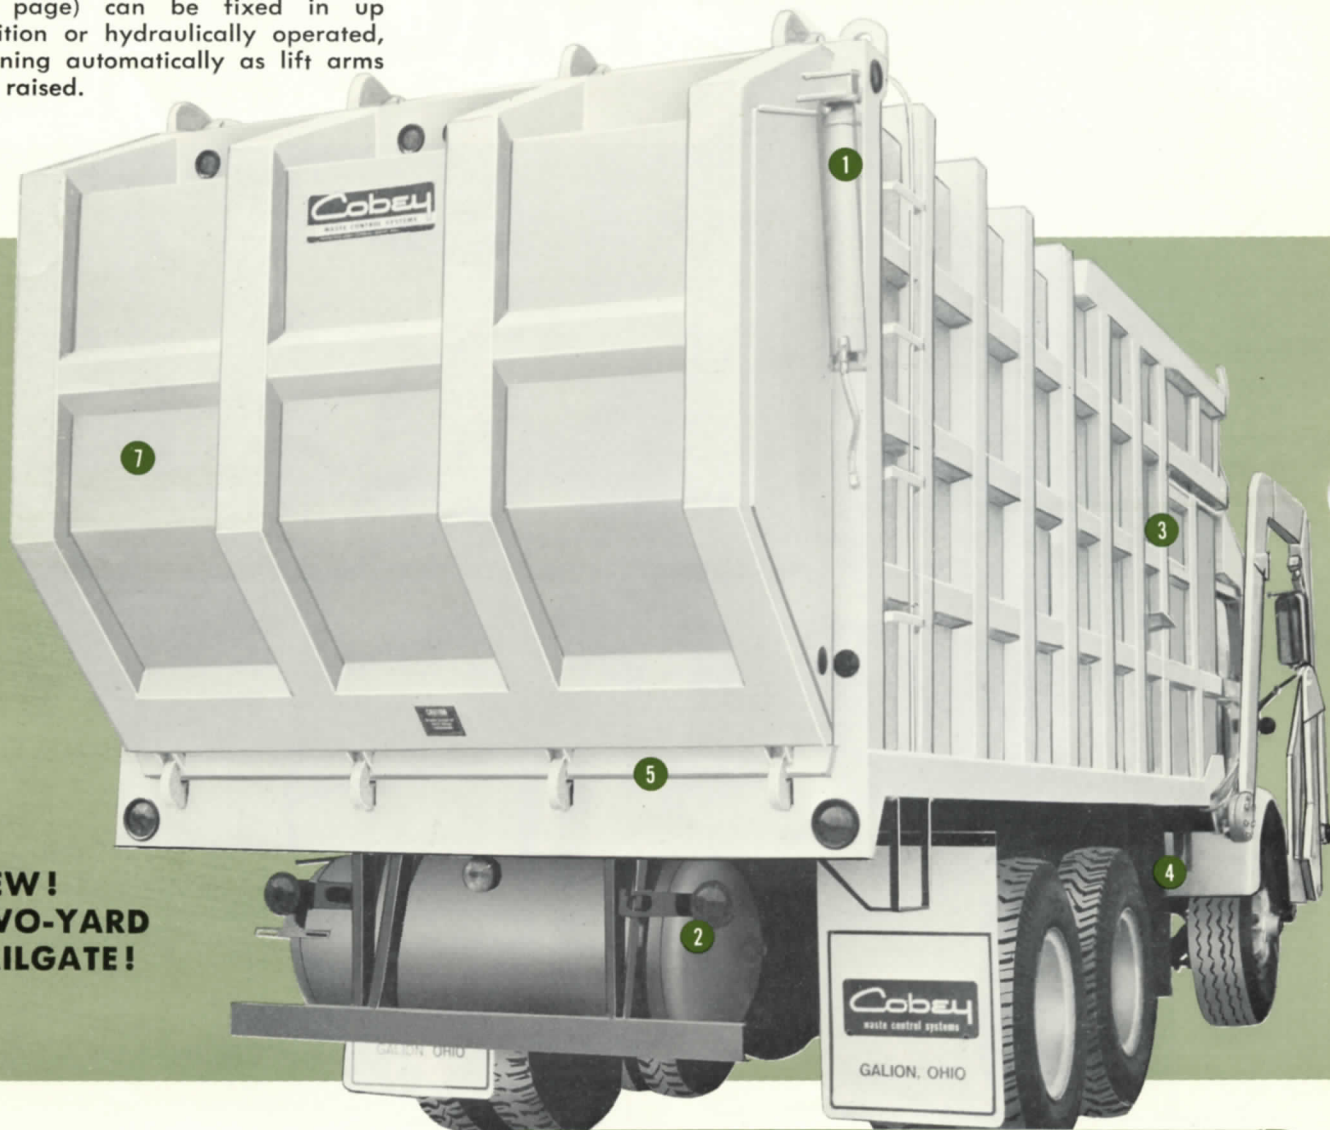

**FORK-STYLE AND CLAW-TYPE PICKUP ARMS, IN 25 AND 31 CU. YD.,
FOR COMMERCIAL, INDUSTRIAL AND RESIDENTIAL COLLECTION**

- 1 **TWIN TAILGATE LIFT CYLINDERS** are precision-honed for dependable service under all load conditions.
- 2 Air pressurized 80-gal. **WASHOUT TANK** optional (see back pg.).
- 3 **SLIDING SIDE ACCESS DOOR** for hand loading and easy servicing of hydraulics.
- 4 Large capacity **SUMP SYSTEM** with quick-opening drain (see back pg.).
- 5 **FOUR HEAVY LOCKING HOOKS** anchor the tailgate. Hooks are operated by a single lever at rear.
- 6 **OPTIONAL LITTERGUARDS** (see center page) can be fixed in up position or hydraulically operated, opening automatically as lift arms are raised.

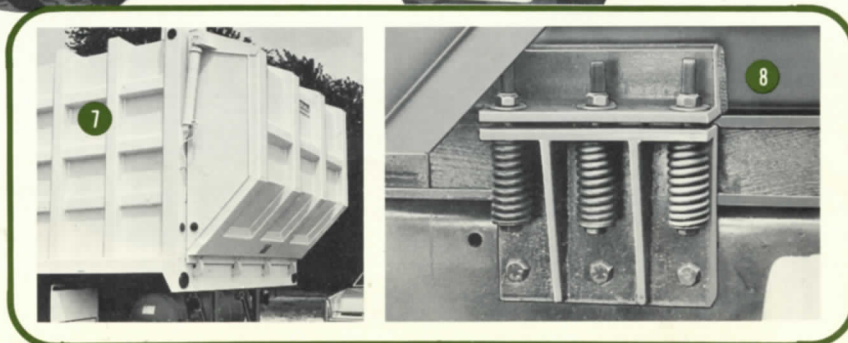

Cobey

WASTE CONTROL SYSTEMS

**NEW!
TWO-YARD
TAILGATE!**

- 7 **COBEY'S NEW 2-YARD "BUBBLE-TAILGATE"** helps "revolve" the load upward as it is packed, for a more complete fill. No more "dead space" between load and roof.
- 8 Heavy duty **SPRING MOUNTING CLIPS** are standard on all Cobey front loaders. Assures less strain on chassis frame and body.

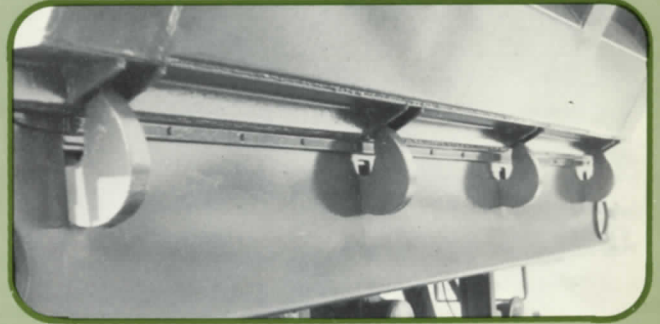

Cobey's Forktainer front loader . . . maximum compaction, maneuverability, payload

The modern, compatible approach to refuse handling . . . a strong, versatile unit that travels with arms down and forks perpendicular to the roadway, for better maneuverability and visibility. **Responsive controls** put the driver in charge, not the truck . . . **maximum compaction** assures more pickups per load . . . **extra maneuverability** lets you make pickups others leave behind. That's FORKTAINER!

PICKUP from dock or ground level, with just 13 feet clearance required. Under wires or low canopies, Forktainer simply lifts container off surface, then backs out to a point free of obstruction and completes dumping. Entire pickup is handled from inside the cab.

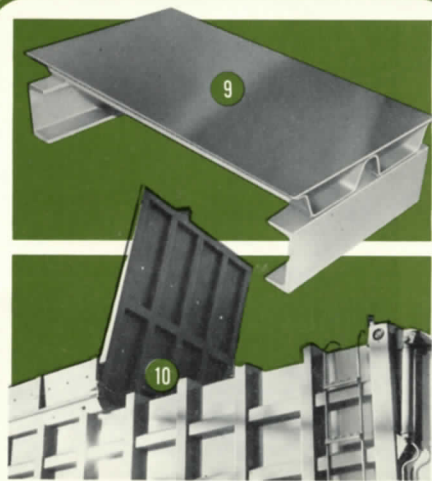

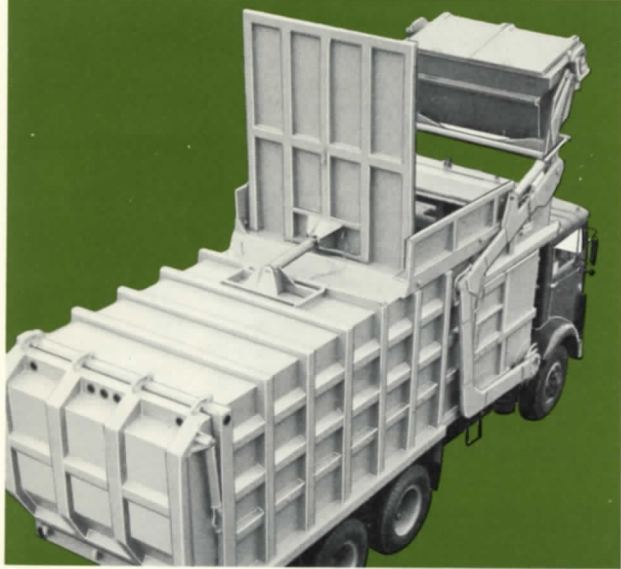

DEPOSIT is safe and easy . . . a rear lever releases the four anchor hooks, and Forktainer's "bubble" tailgate is raised for dumping of the rock-tight load. The platen ejects **all the way**, for free, clean dumping at the landfill . . . in a short few minutes!

Cobey's PAK-TAINER

The front loader collection system that's uniquely Cobey's, and so unusually versatile and easy to operate. Cobey's exclusive "jaw" design lift arms are self-catching and self-locking, for easy pickup from difficult angles, and maximum safety during lifting cycle. Also available in 25 and 31 cu. yd. capacities.

LEVEL-MATIC ACTION . . . In lifting, Pak-Tainer keeps containers level until well past the truck cab, eliminating spillage outside the hopper opening. At the full "up" position, container is tilted 80° into hopper, for complete cleanout.

- 9 "SANDWICH FLOOR" (see right) eliminates sagging, jamming and worn floors. 10-ga. hi-ten steel floor plate, 14-ga. 1½" deep "waffle" support fore-and-aft, 3" structural steel channel crossmembers on 16" centers.
- 10 ONE-PIECE HOPPER COVER (see right) raises as lift arms are raised. Optional cab lever can control cover, for greater flexibility.
- 11 SPECIAL BUMPERS on lift arms absorb shock and noise.
- 12 HIDDEN HYDRAULICS! Behind the front bulkhead, away from damage, weather and wear. Easier to service, too!

SPECIFICATIONS

All specifications subject to change without notice

FORKTAINER

Body Model	FT-1225	FT-1231
Body (Inside Length)	17' 0"	20' 6"
Body (Inside Width)	84"	84"
Body (Inside Height)	74"	74"
Payload Capacity	25 Cu.Yd.	31 Cu.Yd.
Sump Capacity	29 Gal.	29 Gal.
Side Door Opening	30" x 30"	30" x 30"
Hopper Door Opening	84" x 90"	84" x 90"
Lift Arm Capacity	6000 lb.	6000 lb.

Tandem axle chassis required for FT-1231.
Tilt or cab-over only for both units. Check with distributor for C/A and other chassis requirements.

PAKTAINER

Body Model	FT-1225	FT-1231
Body (Inside Length)	(17' 0")	(20' 6")
Body (Inside Width)	84"	84"
Body (Inside Height)	74"	74"
Payload Capacity	25 Cu.Yd.	31 Cu.Yd.
Sump Capacity	29 Gal.	29 Gal.
Side Door Opening	30" x 30"	30" x 30"
Hopper Door Opening	84" x 90"	84" x 90"
Lift Arm Capacity	6000 lb.	6000 lb.

PAKTAINER chassis requirements same as FORKTAINER.

FORK CONTAINERS

UTILITY TYPE w/lids, less casters

Capacity	Height*	Width	Length	Wgt.
2 cu. yd.	40 $\frac{3}{8}$ "	34 $\frac{5}{8}$ "	72"	500 lbs.
3 cu. yd.	50 $\frac{1}{2}$ "	42"	72"	630 lbs.
4 cu. yd.	52 $\frac{1}{4}$ "	54"	72"	800 lbs.

UTILITY TYPE w/lids and side doors, less casters

6 cu. yd.	63"	66"	72"	1100 lbs.
8 cu. yd.	84"	66"	72"	1240 lbs.

TRAIN-TAINER (see bottom of page)

5 cu. yd.	56 $\frac{1}{2}$ **	72"	72"	1750 lbs.
-----------	---------------------	-----	-----	-----------

*Add 7 $\frac{1}{4}$ " to height for standard 6" casters, 9 $\frac{3}{4}$ " for 8" casters.

**Includes 8 $\frac{3}{8}$ " axle-to-ground clearance. All dimensions are maximum O.D.

PAK CONTAINERS

UTILITY TYPE w/lids, less casters

Capacity	Height*	Width	Length	Wgt.
3 cu. yd.	50 $\frac{1}{2}$ "	42"	72"	680 lbs.
4 cu. yd.	52 $\frac{1}{4}$ "	54"	72"	850 lbs.

UTILITY TYPE w/lids and side doors, less casters

6 cu. yd.	78 $\frac{5}{8}$ "	54"	72"	1180 lbs.
-----------	--------------------	-----	-----	-----------

*Add 7 $\frac{1}{4}$ " to height for standard 6" casters, 9 $\frac{3}{4}$ " for 8" casters.

** Includes 8 $\frac{3}{8}$ " axle-to-ground clearance. All dimensions are maximum O.D.

CONTAINER OPTIONAL EQUIPMENT

Available for both PAK and FORK containers:

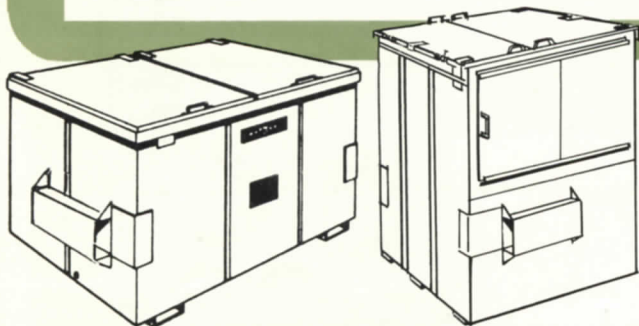

- (1) Torsion springs for vertical end doors.
- (2) Counterbalance springs for container top lids (2, 3, and 4 yd. containers).
- (3) Three-position lid props (2, 3, and 4 yd.).
- (4) 6" rubber or polyurethane casters, two swivel and two rigid. Caster pads are standard on all containers.

STATIONARY COMPACTOR CONTAINER

Available for use with FORKTAINER only. 6 cu. yd., with 63 $\frac{1}{4}$ " x 45" opening. Complete with load-restraining bars, Texite casters (2 swivel, 2 rigid), wgt. 1500 lb. For use with Cobey's SP-10 or SP-20 Stationary Compactors, or equivalent. Ideal container for nursing homes, hospitals, apartments, etc.

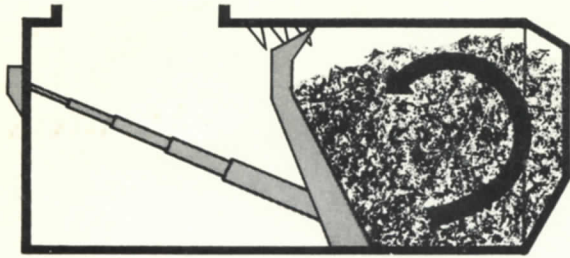

Containers shown at left are FORK style, with pickup sleeves as illustrated. PAK style containers have welded pickup "ears"

COBEY TRAIN-TAINERS (For Use with Forktainer)

Can be used in a train of up to three units, with a pickup truck or similar power. Includes tires and tubes, wheels, 12 oz. duck vinyl coated nylon cover, quick-disconnect ball hitch and ball, tail lights. Capacity 5 cu. yds. Works in conjunction with front loader, for use in congested locations.

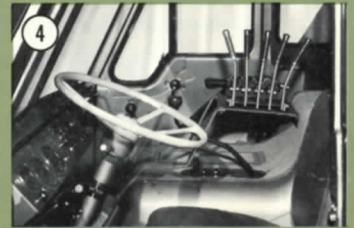

UP TO 92,000 LBS. COMPACTION...

That's the fantastic force exerted by Cobey's heavy duty hydraulic telescoping cylinder (on the 31-yard unit). The platen is shaped to force refuse to rear and upward in a rotating motion with this extreme pressure, while retaining "teeth" (at top of illustration) prevent material from falling backward as the plate is retracted. Heavy duty hinges and latches on rear door are designed to take the terrific force of compaction.

STANDARD EQUIPMENT

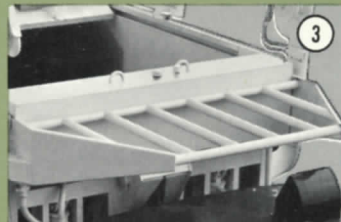

- 1. SLIDING SIDE DOOR** (curb side), helpful in tight situations where a "swing-open" door could not be used. For side loading or service of hydraulic system.
- 2. LARGE CAPACITY SUMP SYSTEM** handles refuse liquids, with body floor inclined forward to sump opening. Clamps give a full opening, drains in seconds.
- 3. HEAVY DUTY LATCH HOOKS** assure safe, positive closure of tailgate. Single lever at rear

operates hooks.

- 4. IN-CAB CONTROLS** are standard. Driver can handle complete route function without leaving the cab. Color-coded levers, with "dead man" safety feature.

Also standard: Windshield guard rail; heavy duty pump and PTO; heavy duty oil filter; 70-gal. front oil reservoir; automatic hydraulic hopper cover; ICC lights, reflectors and mud flaps.

OPTIONAL EQUIPMENT

- 1. 80-GAL. WASHOUT TANK**, with hose, spray nozzle and gauge. Hose brackets at front for most efficient use, tank at rear. For sanitizing containers and inside hopper, if desired.
- 2. CAB-SCOPE**, gives operator a complete view of dumping cycle, keeps him in command at all times.
- 3. CAB GUARD**, for mounting over the truck cab

- 4. OUTSIDE CONTROLS** (with throttle control), color coded, with "dead man" safety feature.

Also optional: Hydraulic or fixed litter guards; hopper cover control (in cab), in lieu of automatic hopper opening; air-operated PTO; "hot-shift" PTO (for auto. trans. only); "Transa-Pak" . . . lets you "pack-on-the-run" (for auto. trans. only).

Pictures are illustrative only. Products must be used in conformity with safe practices and any applicable codes and regulations.
