

# CONTAINERS

FOR USE WITH THE

**Cobey  
LIFTAINER  
System**

## HEAVY REINFORCED BOOM REST

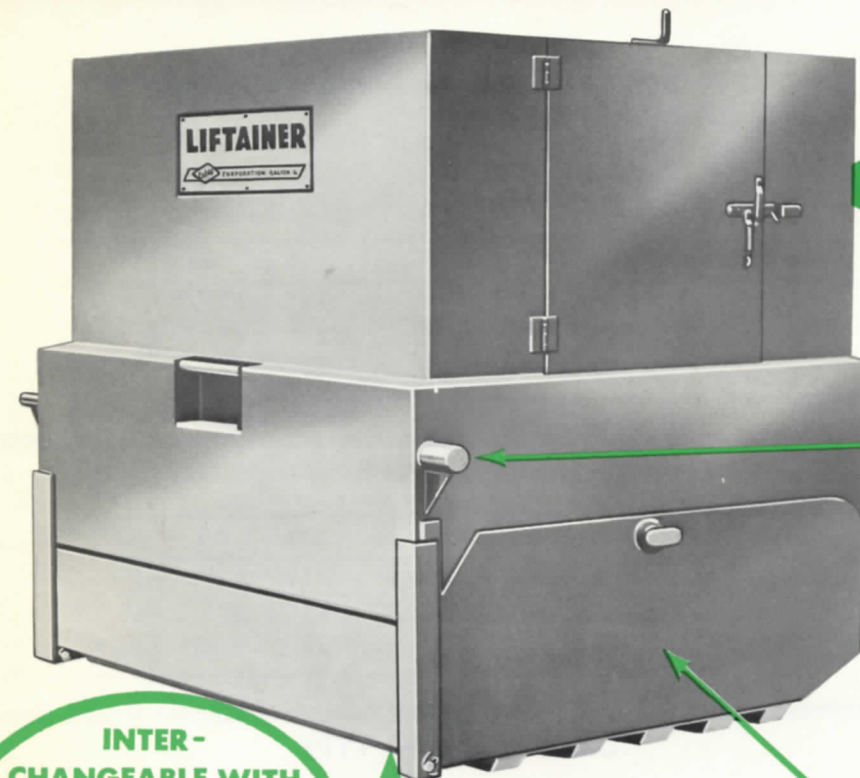

Massive boom rest, with heavy reinforcing gusset, gives maximum strength to assure long, uninterrupted service.

## ALL STEEL CONSTRUCTION

Heavy Steel Plate Bottom Section.  
Lighter Steel Plate Top Section.  
(Optional Door Openings at Customers Request.)

## RECTANGULAR, OVER-LAPPING WING BOTTOM

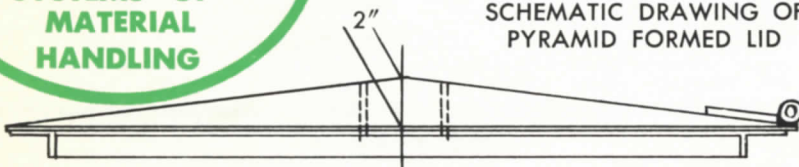

Bottom and end wings are of one-piece, full-width construction—distributing load over entire length and width of bottom—rather than placing all stress on pick-up point. Full rectangular end wings make bottom self-aligning—no guides needed. Also provides tighter fit, and controls wind blowing of trash during dumping operations.

**INTER-CHANGEABLE WITH CONTAINERS USED WITH SIMILAR SYSTEMS OF MATERIAL HANDLING**

LEAK-PROOF SUMP BOTTOM. NO GASKETS OR SEALS REQUIRED.

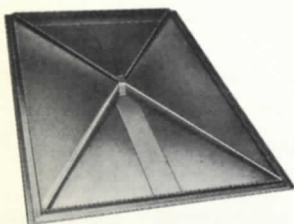

SCHEMATIC DRAWING OF PYRAMID FORMED LID

## PYRAMID-FORMED TOP LIDS

This design gives added rigidity to the lids and reduces weight of lids—making them easy to handle.

LEFT—Pyramid design is fully reinforced by 4 steel rods and center U-brace—all securely welded to lid.

● SPECIAL CONTAINERS OR TANKS CAN BE BUILT TO YOUR SPECIFICATIONS.

● ENGINEERED FOR LOWER INITIAL COST — LONGER SERVICE LIFE!

## AVAILABLE IN THE FOLLOWING TYPES:

- Oval Top
- Utility Type
- Drop-Bottom
- Tilt
- Skip
