Western United
States Refuse
Industry.

Strong,
Fast,
Durable,
Dependable.
Everything
you've come to
expect from the
people at C & O
Manufacturing.

THE BETTER BODY PEOPLE

C & O Eliminates the "SPEC'ulation" from "SPEC'ing"

At C & O we take the guesswork out of specifications for a front loader by incorporating as standard equipment many of the items which are usually extra cost. These include:

- Hot Shift P.T.O.
- Plow Steel Packer Wear Plates
- Inside and Outside Controls
- 8,000 Lb. Over Cab Arms
- Hydraulic Tank Side Filler With Strainer and Sight Gauge
- In Tank Primary Filter
- Horizontal Packer Cylinders if Desired at No Extra Charge
- Arms on Body if Desired at No Extra Charge
- Front Portion of Body Watertight if Desired
- Hyco, Commercial Shearing, and Meta Cylinders

In addition, we incorporate many standard features which are generally not available in the industry, such as:

- Hi-Tensile Steel Bulkheads, Fishplates, and Cylinder Hangers
- Self Aligning Arm Cylinder Rod End Bearings
- Machined Bearings on Packer Cylinder Pins
- Main Cross Shaft Roller Bearings
- Fork Cross Shaft Roller Bearings

Of course, there is the usual installation on your chassis, deceleration valve on the arm upstroke, grill guard, hydraulic canopy cover, flaps, lights and reflectors, body primed and painted one color, and body hoist lockout feature. Additional options are available at extra cost. When comparing prices, be sure to ask which of our standard features are included in competitive models.

Our Roll Offs Roll On and On and On and On and On...

Check our standard features, such as Hot Shift P.T.O., suction and return line filters, side fill hydraulic tank with strainer and sight gauge, commercial shearing pump, plus the rugged construction you have come to expect from C & O Manufacturing. Either winch type with front, mid, or rear mount, or reeving type is available.
