

HYDRO

# E-Z PACK

Model

# A-16

## Sanitary . . . Efficient . . . Economical!

The Hydro E-Z Pack cuts refuse removal costs! Actual crushing compaction provides greater payloads . . . eliminates special routing due to bulky materials—for less man hours per tons hauled! No other special equipment is needed to cover the route . . . E-Z Pack hauls all types of refuse in one load! Fewer working parts reduce maintenance costs . . . watertight body provides a cleaner, more healthful city!

### Telescopic Cylinder

Double-acting cylinder packs and unloads . . . has 8½" diameter to provide greatest compaction force . . . won't twist or strain . . . easily compacts 76,600 pounds pressure against any load!

### Specially Designed Blade

Scientific design of packer blade carries load from bottom to top with equal amount of pressure at all areas—no part of load is without full compaction.

### Sanitary Body

Body is watertight . . . heavily reinforced rear door is one piece—will not deflect or gap during packing cycle. Single lever operates all six endgate latches. Body liquid is easily drained by sump.

## STANDARD EQUIPMENT

### Hydraulic System

- Multi-stage telescopic two-way hydraulic cylinder
- One spool-type valve
- 30 G.P.M. roller bearing pressure regulated pump

### Drive Mechanism

- Power take-off
- Drive shaft, 1 1/4 in. with 2 heavy duty universal joints

### Control

- Cab-mounted remote cable controls for power take-off and packer control valve

### Doors

- Two sliding top loading doors
- Two hinged upper side loading doors open to rear and lock
- Two center side loading doors, open to rear and lock
- Two lower side loading doors, swing down
- Spring-loading latches on all side doors
- One-piece top-hinged tailgate
- Quick-opening clamps
- Special one-piece rubber seal

### Body

- Floor sheets, tailgate and packer face Hi-Tensile steel
- Upper side sheets 12 ga. Hi-Tensile steel
- Lower side sheets 3/16 in. Hi-Tensile steel
- All box frame bracing Hi-Tensile steel
- Watertight to 14 in. above floor line

### Sump

- Forward-mounted sump
- Two lever-operated sump drains
- Entire lower portion of body watertight, total capacity approximately 830 to 1150 gal., (depending on body length)

### Sills

- Tapered longitudinals provide liquid drainage forward into sump

### Steps

- Folding roll-over steps with "Grip-Strut" treads on both sides of body below loading openings — no springs or catches required.

### Rear Steps

- Two Tailgate-mounted rear steps, adjustable height, swing up out of way when not in use and with grab handles.

### Lights

- ICC lights, reflectors.

### Signals

- Two push button signals at rear, 1 each side, operate truck horn to signal driver.

### Paint

- White enamel

## OPTIONAL EQUIPMENT

### Remote Controls

- Operates packer from ground

### Lights

- Turn signals

### Paint

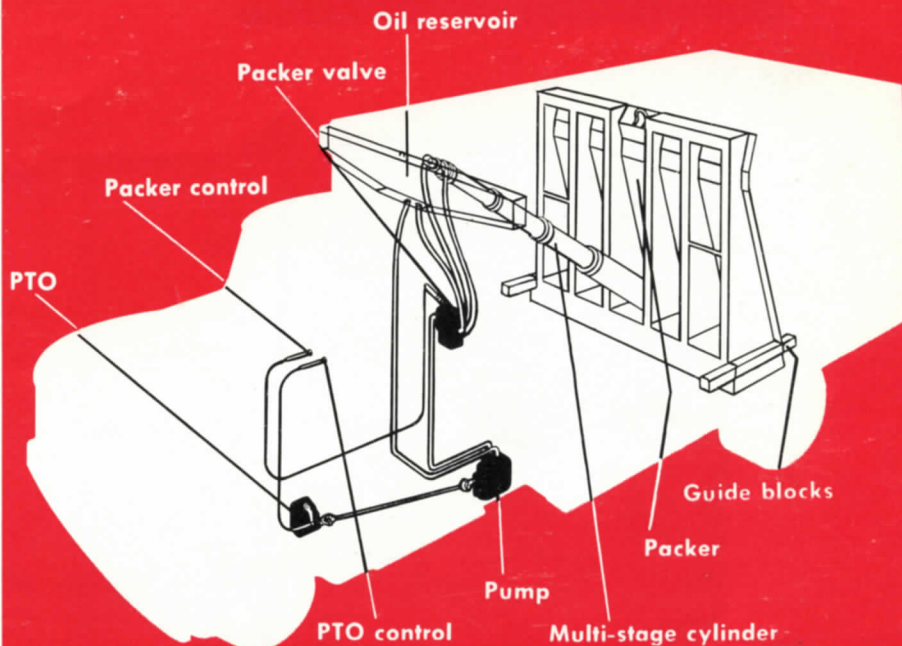

- Any color combination or special paint work priced upon application.

### Mounting

- Factory mounting available.

### Tailgate Check Cylinders

- Hydraulically operated

## BODY SPECIFICATIONS

Body Length.....	14 Ft.
*Body Capacity.....	16 3/4 Cu. Yds.
Overall Length (A).....	168 In.
Inside Width.....	80 1/4 In.
Inside Height.....	66 In.
Overall Width.....	95 1/2 In.
Overall Height (B).....	117 1/2 In.
Door Opening (C).....	36 In.

\*Platen Face to tailgate  
 \*\*Add 492 Lbs. with oil, P.T.O., parts and pump  
 \*\*\*Maximum @ 1350 P.S.I.

Oil Capacity.....	.33 Gal.
Body Liquid Capacity.....	830 Gal.
**Approx. Body Weight.....	6850 Lbs.
Cylinder Stages.....	8-7-6-5 In.
Total Stroke.....	.113 In.
Packing Cylinder Diameter.....	.8 1/2 In.
Loading Height Above Frame.....	23 In.
***Total Compaction Force.....	76,600 Lbs.

### Recommended Chassis Specifications

Chassis Type.....	Std. or Cab Fed.
Approx. G.V.W. ....	17,000 Lbs.
Approx. Wheelbase.....	172 In.
Approx. Cab-to-Axle (C/A).....	102 In.
Rear Springs.....	Heavy Duty

Specifications subject to change without notice
