

# CONTAINER SYSTEM

...neat, sanitary, efficient, low-cost answer to rubbish accumulation and disposal!

# CONTAINERIZATION

## NO UNSIGHTLY TRASH HEAP

So many buildings have a helter-skelter collection of barrels, cans, cartons and litter. This sort of trash accumulation is unsightly, unsanitary, inefficient and completely unnecessary.

## A BETTER WAY TO COLLECT RUBBISH

Use our E-Z PACK Containers. Gone is the old trash heap. Strong, tight steel containers replace barrels, cans and boxes. Refuse is protected from wind, animals and vermin. And E-Z PACK Containers are roomy—each cubic yard of capacity equals almost seven 30-gallon trash cans! Put E-Z PACK Containers on docks, in alleys, or at convenient collection points (inside or out).

## SIMPLIFIED TRASH PICKUP

On a regular schedule, our E-Z PACK Refuse Packer makes the rounds and empties each container into the huge packer body. In the body, trash is compacted hydraulically; never leaks, spills or blows away. This clean, simple system saves man hours, saves collection costs, *saves you money.*

## AN ECONOMICAL CONVENIENCE

Our E-Z PACK Trash Container Service ends sights and odors of the heap for you. It also eliminates fire and health hazards. Cost? Extremely low, especially when you consider that you make no capital outlay, you save trash can replacement costs, you save house-keeping costs. And, for a nominal fee, you get the containers you need and a dependable refuse pickup service.

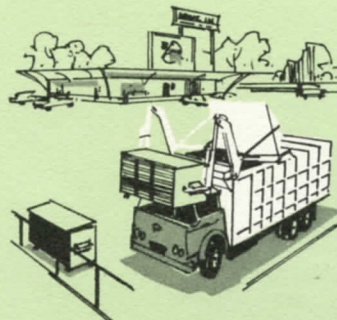

E-Z PACK Containerized Refuse Handling is ideal for . . .

INDUSTRIAL FIRMS

MUNICIPAL COLLECTIONS

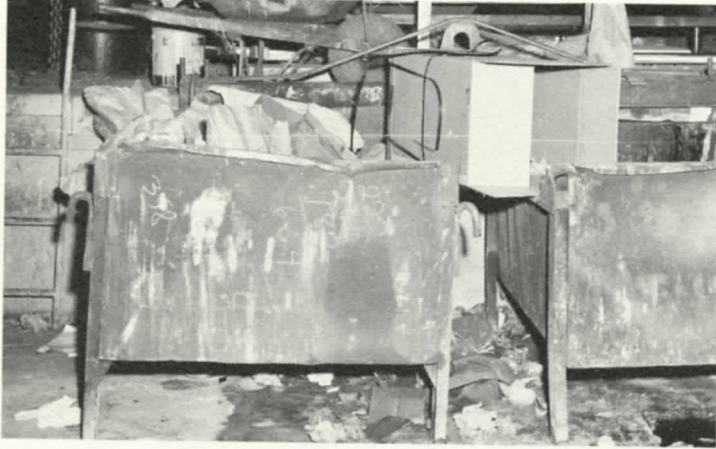

COMMERCIAL ESTABLISHMENTS
