REAR LOADER by E-Z PACK

"PICK OF THE PACKERS"

2½ Cu. Yd. Super Hopper (88 inches wide) allows ample room for two men to dump at same time. Number of packing cycles required to load unit is slashed in half — doubles packer service life! Simplified design and low maintenance makes the E-Z Pack Rear Loader ideal for large scale refuse removal. Only 3 hydraulic cylinders required to pack, lift tailgate and eject load — with no hydraulic hoses or tubing located within the tailgate. You make more pickups per man-hour because reload starting time requires only 12 seconds. E-Z Pack Rear Loaders come in 16, 20 and 25 cubic yards capacities.

Push Button Control System — electrically actuated for either automatic cycling or manual operation. Packer plate can be stopped or reversed at any point in cycle.

Manual Back-up Control System — provides packer plate manual operation by hydraulic power. Hooks up quickly and easily and is operated from curb side of Hopper.

FEATURES

- Only Three Hydraulic Cylinders — perform all packer operations.
- Unitized Hydraulic Control System — centralizes valves for easy servicing.
- Manual Hydraulic Control — backs up automatic system, loading and unloading can be accomplished by this system alone.
- High-Tensile Steel Body — built watertight, and features a twin-seal gasket between hopper and body.
- Simplified Design — minimizes hydraulic tubing, hoses, and valves, eliminates hydraulic hose within the tailgate.
- Outside Lubrication Points — allow quick, routine maintenance, not necessary to raise tailgate to lubricate.
- Side Door Double Latches — keeps door from popping open during compaction. Released by one lever.
- Non-obstructing Ejection Plate — constructed so cylinder housing will not obstruct removal of trash. Lets load drop completely free.
- Four-point Tailgate Latch — holds gate at four points, all release by a single lever. Individual latches are adjustable.
- Handles 1 and 2 Cu. Yd. Containers — overhead winch for larger capacity containers to 10 cu. yds.
- Right Selection of Models — available with 16, 20, and 25 cubic yard bodies for 102" or 135" C.A. and 120" or 138" C.T.
- Full-width Rear Step — and convenient extra-long handrails provide safe place for men to ride.

SPECIFICATIONS

BODY

Floor Sheet: 10 Ga. Hi-Ten Steel
Side Sheet: 11 Ga. Hi-Ten Steel
Top Sheet: 11 Ga. Hi-Ten Steel
Side Door: 36" x 36" — curbside standard

TAILGATE

Hopper Capacity: 2½ cubic yard
Hopper Bottom: ¾ Cor-Ten Steel
Loading Height: 1" to 4" below frame
Load Opening Height: 50" to 66"
Load Opening Width: 88"
Full-width rear step and grab rails

PACKING SYSTEM

Reload Time: 12 Sec.
Total Cycle Time: 30 Sec.
Packing Control Location: Curbside Standard

EJECTION SYSTEM

Wood Guide Shoes on Ejector Panel
Full Travel: Reversible Ejector Panel
Ejection Controls: Left front corner of body

HYDRAULIC SYSTEM

Operating Pressure: 1400 PSI
Packing Cylinders: Two — 6½" Bore, Double-Acting
Ejection Cylinder: One — 7½" First stage, Double-Acting Telescopic
Oil Capacity: 33 Gal.

LIGHTS AND SIGNALS

Standard ICC Lights and Reflectors
Buzzer Standard on Tailgate; Curbside

OPTIONS

Left Side Packer and Signal Control
Dock Side Controls
Left Side Body Side Door
Container System
Overhead Winch System
Auxiliary Engine
Special Lights — Back-up, etc.
Special Paint

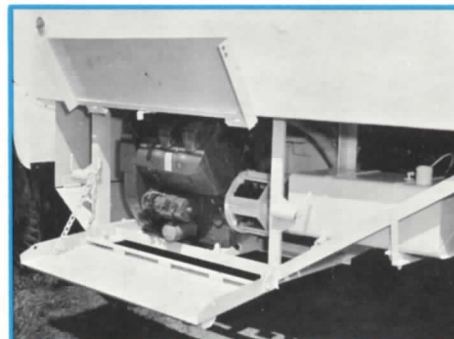

SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE

Conventional 1 yard and dock type 2 yard container systems are available with E-Z Pack RL. Just hook chains to packer plate cylinder base and activate packer for fast, easy, no spill dumping. Simple but sanitary collection.

E-Z Tip large capacity containers (4, 6, 8 or 10 cu. yards) are just the thing for big commercial or industrial applications. Requires optional overhead winch — hydraulically driven for simple, trouble-free operation.

Auxiliary Engine — famous Wisconsin V-4 available on all RL's, enables you to cut operation costs to a minimum and insures longer chassis operational life. Mounts under body on driver's side and provides adequate ground clearance.
