

E-Z PACK

ECONOTRAIN
CONTAINER SYSTEM

**FOR FAST, ECONOMICAL
REFUSE COLLECTION**

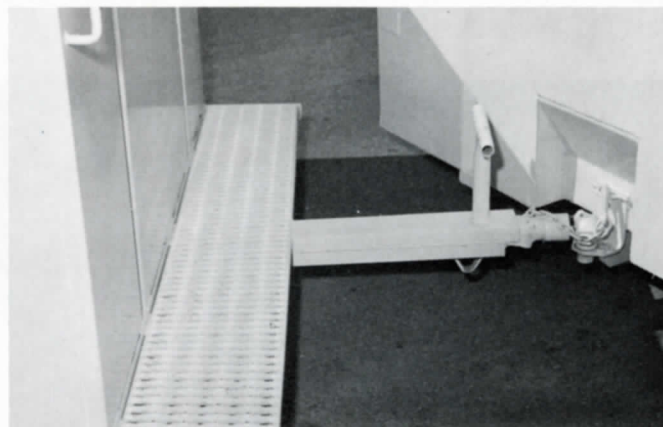

MODELS CT-4, CT-5 4 cubic yards, 5 cubic yards

FOUR OR FIVE CUBIC YARD CONTAINERS . . . in 3-container train units pulled by pickup or light truck, for use with E-Z Pack Front Loader packer. 50" or 56½" loading height. Takes only 10 minutes to dump a container train into a Front Loader. Rugged construction. All welds, by automatic process, are inside to make unit watertight.

GREAT FOR BACKYARD, ALLEY PICKUPS . . . for residential, light commercial and industrial refuse collection. Train can turn tight corners . . . tows at 30 mph speed, loaded or empty, with no whipping. Crew rides on safety platform.

A REAL MONEY SAVER . . . because it lets you get more work done in less time, with fewer people and lower investment in equipment. One EconoTrain driver and 2-man pickup crew will load a 3-container train in 1½ to 1¾ hours (depending upon density) . . . and they never leave the job! Tow truck mileage up to 15 miles per gallon means lower operating costs, too.

LETS ONE PACKER DO WORK OF FOUR—One 20-cubic yard E-Z Pack Front Loader will take the refuse load of from nine to eleven 4-yard EconoTrain containers.

URNS TIGHT CORNERS. Excellent maneuverability for turns in streets and alleys. Nylon contour fitted covers eliminate road spillage.

HEAVY DUTY TRAILER HITCH. Side opening type, with rear ball hitch recessed—"T" lift bar insures easier handling and is standard equipment.

DUMPING IS FAST, EASY

E-Z Pack Front Loader driver aligns packer with container, then moves truck forward until forks engage lift bracket assemblies on sides of container. He actuates lift arm lever and raises train container.

Container remains level until reaching dumping point, then is rotated to dump the load into E-Z Pack hopper. Container is returned to the ground in the same easy manner.

"V" crimps in side walls reinforce area of pickup assembly.

	Capacity	Height	Inside Width	Inside Container Length	Overall Length Ball to Ball	Approx. Empty Weight
MODEL CT-4	4 cu. yds.	50"	72"	68"	108"	1100 lbs.
MODEL CT-5	5 cu. yds.	56½"	72"	72"	112"	1200 lbs.

Vinyl Coated Nylon Cover—Standard Equipment.

Specifications subject to change without notice.

Optional Equipment: Rubber bumper kit cushions top rim, all sides.
