## Designed for maximum performance

Our dependable FLHC 80D-33/23 packs a lot of muscle, with tough, quality features from its solid arm front loader to its self-latching bubble tailgate.

This is the front loader that will set the standard for solid waste handling in years to come. We've combined proven E-Z Pack® designs with new innovations to produce the best unit available today.

The E-Z Pack® Front Loader packs loads up to 1½ times its body weight ... 30 to 50% more payload than competitive units. This packing muscle comes from strong triangular bracing for unmatched durability, and a rounded bubble tailgate for efficient load flow and retention.

## Built for ultimate economy

The FLHC 80D-33/23's durable construction means you get more years of dependable performance. Its greater payload means you can use fewer trucks and run larger routes. And fewer trucks mean that you save on fuel, insurance, tires, maintenance, and manpower. The E-Z Pack® Front Loader offers the reliability, efficiency, and economy to maximize your solid waste handling operations.

# E-Z Pack®

### Triangular bracing and interlaced understructure

Peabody's exclusive wrap-around triangular brace construction and exclusive interlaced understructure provide a strong, rigid body

that can take almost any punishment — time and time again.

### Lift arm carrier brackets and lifting forks

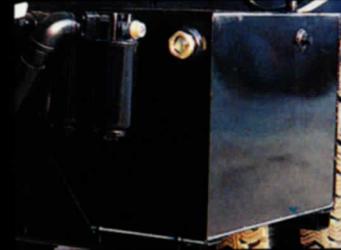

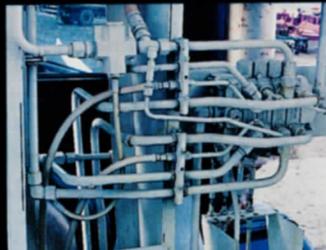

Carrier brackets provide a secure grip on lift arms during travel, and reduce stress on trunion bearings

and hydraulic components while driving.

### Higher-capacity hydraulics

A large capacity pump and oil lines provide more fluid to components for faster cycle time. Oil reservoir is positioned for easier access and better weight distribution. Fewer hydraulic lines and components simplify maintenance and provide a cleaner, hazard-free appearance.

### Mechanical hopper cover

Dependable operation at every pickup is assured with Peabody's exclusive mechanical hopper cover which is linked directly to our lift arm cycle. This automatically operated component is virtually maintenance-free for added reliability.

### Hopper design

The hopper design increases effective body capacity for greater payloads. The unit also provides more retainer teeth for larger denser loads.

### Container dump cylinders

Easy, secure container control and handling are provided with dependable cushioned container dump cylinders.

### Convenient driver controls

The E-Z Pack® Solid Arm Front Loader is easy to operate and handle, so your drivers will need only a minimum of training.

Smooth cable control makes lift operations simple. For convenient driver access, all tailgate and ejection controls are located in the cab.

# High performance features for SUPERIOR OPERATIONS

shioned cylinders  
shioned lift arm cylinders elim-  
te shocking and noise at the  
d of each cylinder stroke, and  
end cylinder and lift arm life.

#### Ram packer panel and retainer teeth

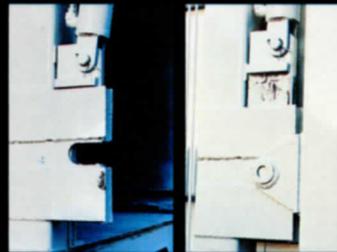

The panel's ram configuration allows for maximum transmission of the system's powerful packing force, resulting in a uniform,

#### Large packing cylinder

Peabody's specially-designed, telescopic packing cylinder provides 145,000 pound compaction force for denser, more compacted payloads. And because of this

#### Self-latching bubble tailgate

A rugged, self-latching tailgate assures positive closure. Its bubble design improves load flow and retention to increase effective load-carrying capacity. Automa-

densely compacted load. The unit rides in floor-level tracks for longer guide shoe life. Retainer teeth at the top of the panel grip loads for better compaction.

high compaction force there is virtually no guide track freeze-up.

tic hydraulic operation assures smooth, dependable service. The bottom and body sides are sealed well above normal liquid levels to reduce leakage.

**A combination of new and proven design features in virtually every part of the FLHC 80D-33/23 contributes to its reliable, efficient operation.**

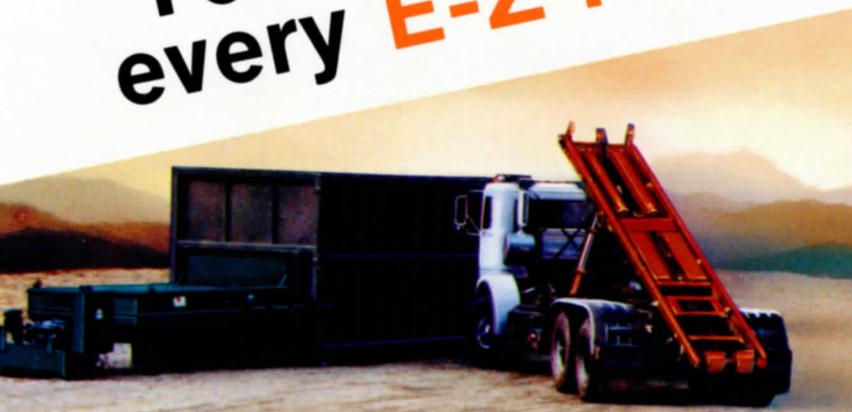

### Optional Equipment

- Live power for pack-on-run capability
- Washout system with 70-gallon pressure tank
- Cab-o-scope
- Cab protector shield
- Direct drive combinations (consult Factory for available drives)

**OPERATION**

Technical experience backs  
every **E-Z Pack**<sup>®</sup> unit!

E-Z Pack's<sup>®</sup> line of front, side, and rear loaders is backed by more than 70 years of experience in waste handling equipment and systems. We manufacture a full range of waste management equipment and systems, designed and built to our own rigid high standards of quality and performance.

Our engineers are ready to help you plan the most efficient systems for your current and long-term waste handling requirements. We can supply the precise equipment to meet those needs. And, we can provide on-going service for your equipment needs through our national network of distributors.

# TWO MORE MODELS WITH SELF-LEVELING ARMS

## E-Z Pack<sup>®</sup> HC/33-23 Front Loader

Built to take use, this rugged unit has the muscle to stand up to just about any punishment! Features wrap-around triangular-braced construction that keeps it looking great, and exclusive interlaced understructure for added strength. And better yet, advanced engineering enables the high compaction HC/33-23 to pack loads up to 1½ times its body weight. Think of it—greater payload that pays off for you year-after-year!

This new front loader from E-Z Pack<sup>®</sup> has many cost saving features that increase overall productivity! High tensile steel construction assures more strength and greater capacity. And not only that....this rugged unit is competitively priced.... ideal for many applications including commercial, industrial and residential use!
