# THE HI-CAPACITY SIDE-LOADER\*

\*Available in a range of body sizes to fit various route and system requirements.

**This one-man refuse collection system can cover more territory. And Peabody's system engineers make route-planning decisions.**

These high capacity E-Z Pack Side Loaders represent an important new way to fight rising manpower and equipment costs!

Now, just one man can collect as much or more trash during a normal work day than a three man crew using conventional, high-density rear loaders.

With E-Z Pack Side Loaders on the job – cleaning up neighborhoods no longer means cleaning out your operating funds.

Just as important – E-Z Pack Side Loaders are made by Peabody, the industry leader in total refuse handling systems with more than 70 years experience.

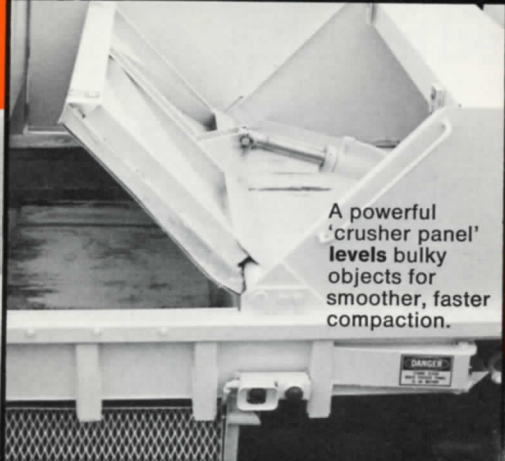

Right-hand operating position (in addition to conventional drive) increases driver and route coverage efficiency.

Compactor is engaged automatically when vehicle is put in neutral – and packs at high speed.

Low hopper height reduces effort and lessens operator fatigue.

A powerful 'crusher panel' levels bulky objects for smoother, faster compaction.

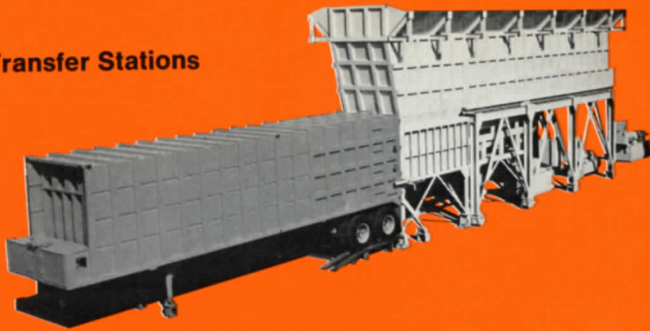

One-piece body/hopper dumps quickly and cleanly – operator can engage compactor while unloading to clean out hopper and body.

Our engineers can help operating budgets cover a lot  
Our engineers can help you make all the right

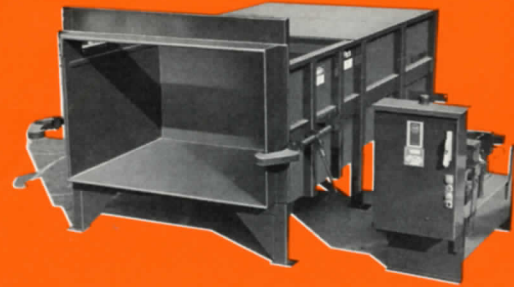

Our national network of distributors provide on-going service for all your equipment needs and Peabody systems engineers are available to help design the most efficient long-term plan for meeting your **total refuse handling requirements.**

Transfer Stations

Stationary Compactors

Front Loaders

Rear Loaders

**And Peabody makes it all...  
That means...we can sell what you need,  
not what we need to sell!**

**...including this newest member of the Peabody  
full-system family. Talk to your E-Z Pack Distributor today.**
