

E-Z Pack[®]

M200 Series Rear Loaders

Engineered for high volume municipal service.

Low sill height, unobstructed 2 cu. yd. hopper, 10 second reload time and 20 second cycle time speeds collection.

Telescopic ejection cylinder allows clean emptying by extending curved ejection blade beyond body.

Peabody Solid Wastes
Management

The new, economical E-Z Pack M200 ejection-unloading rear loader was designed and engineered especially for high volume municipal refuse collection service. A full 2 cu. yd. hopper, wide range of body capacities and a reload time of only 10 seconds speeds collection. Various body capacities adapt profitably to operations in large or small cities. One piece packing blade quietly and cleanly sweeps hopper bottom. Compaction force is automatically *increased* with the load. There are no obstructions in the hopper to hamper loading. The new M200 provides greater efficiency and the lowest cost per yard of volume.

Complete Specifications on reverse side.

E-Z PACK M200 SERIES REAR LOADERS

Operational Features

- Compaction Cycle . . . fully automatic with instant stop switch, and manual override
- Cycle Time 20 seconds
- Packer Blade curved, one-piece construction
- Ejector Panel steel guide shoes, floor level track
- Packing Cylinders positioned away from refuse for clean operation
- Ejector Cylinder telescopic, extends blade past body
- Loading height 5" below chassis frame

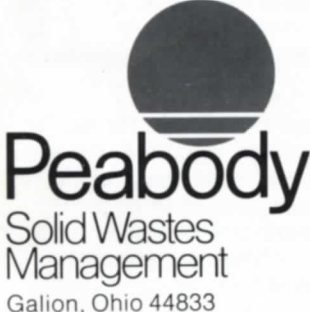

**Optional Container Dumping Devices . . . handle containers up to 10 cu. yd.*
