

HALLER

REFUSE COLLECTOR

HALLER - REFUSE COLLECTOR

Typ X1

X-1 The Industrial Waste Collection Vehicle

The HALLER X-1 is one of the largest in its class, a strong and reliable compaction system makes the X-1 perfect for heavy trade and industrial waste collection.

The X-1 has a large 2.5 m³ hopper, with an electronically controlled compaction system to eliminate noise and give a smooth 30 second cycle, an electronic fault diagnostic system is also included in the electronic panel for quick and easy repairs. The tailgate is greased with a central lubrication system built within the compaction blades.

The body is available in various sizes from 18 to 28 m³ and is continuously welded for maximum strength. The vehicle can be equipped with a variety of lifters including skip lifters (see illustration).

DATA:			
Hopper Floor	: 10 mm XAR 15 450HB	Body Floor	: 4 mm ST 52
Sides	: 5 mm XAR 15 450HB	Side	: 3&4 mm ST 52
Width	: 2050 mm	Roof	: 3&4 mm ST 52
	Packing force : 40 tonnes at 180 Bar		
	Hydraulic Pump : 80/40 ltr/min		

The equipment is provided to a high standard of safety and complies totally with the CE legislation and all statutory requirements.
