

HALLER

REFUSE COLLECTOR

HALLER - REFUSE COLLECTOR

Type **X2**

X2 The Universal Waste Collection Vehicle

The range of waste collection and compaction vehicles produced by HALLER covers all the necessary requirements for the collection and transport of domestic, industrial and mixed waste. Compatible with all types of hydraulic lifters capable of handling a variety of waste containers.

DATA FOR THE HALLER X2 WASTE COLLECTION VEHICLE

- Standard sizes from 15 to 23 m³, also non standard sizes available.
- The collection body has been manufactured with robot-welded seams.
- The movement of the packing mechanism is guided and electronically controlled, reducing noise and keeping the complete compaction cycle to 20 seconds.
- Return filtration of 25 microns is integrated into the oil tank, giving a long-lasting pump life with maximum efficiency.
- High quality ST52 steel plate is used in the collection container.
- New design of the front cross member assembly in the body.
- Double acting telescopic cylinder powers the ejector plate.
- The trough is made from 10 mm XAR 15 plate, 450 HB, this fine grain steel gives maximum resistance to wear.
- Silent hydraulic pump with double body.
- Central lubrication system for packing mechanism.
- A rear door is available for easy fitting of 6 bolt lifter.
- The compaction system is electronically controlled with a built-in fault diagnostic system incorporated in the in-cab control panel, for easy and quick repairs.
- The equipment is provided with a high standard of safety and complies with the CE legislation and all statutory requirements.

Our sales engineers will gladly provide further details and technical information during a personal discussion
