

Lödal EVO

The most cost efficient refuse hauler
ever designed.

and here's why . . .

Lödal, Inc.

Here's why Lodal EVO gives you bigger, faster payloads for a better payoff.

All around vision, from a dual stand-up cab.

The EVO offers a stand-up or sit-down driving position on both sides of the cab. There is also better all-around vision for the operator who can see directly in front of the cab for greater safety.

Power Module

Drawers In & Out
8 Hr. Change Over

Rugged Bumper

Super Strong
Built In Tow Loops

EVO designed for one, two or three person crews

The EVO offers the most cost efficient and highest production in the business with single operator or two person crew.

Exhaust Brush Guard

Protects Vertical Stack

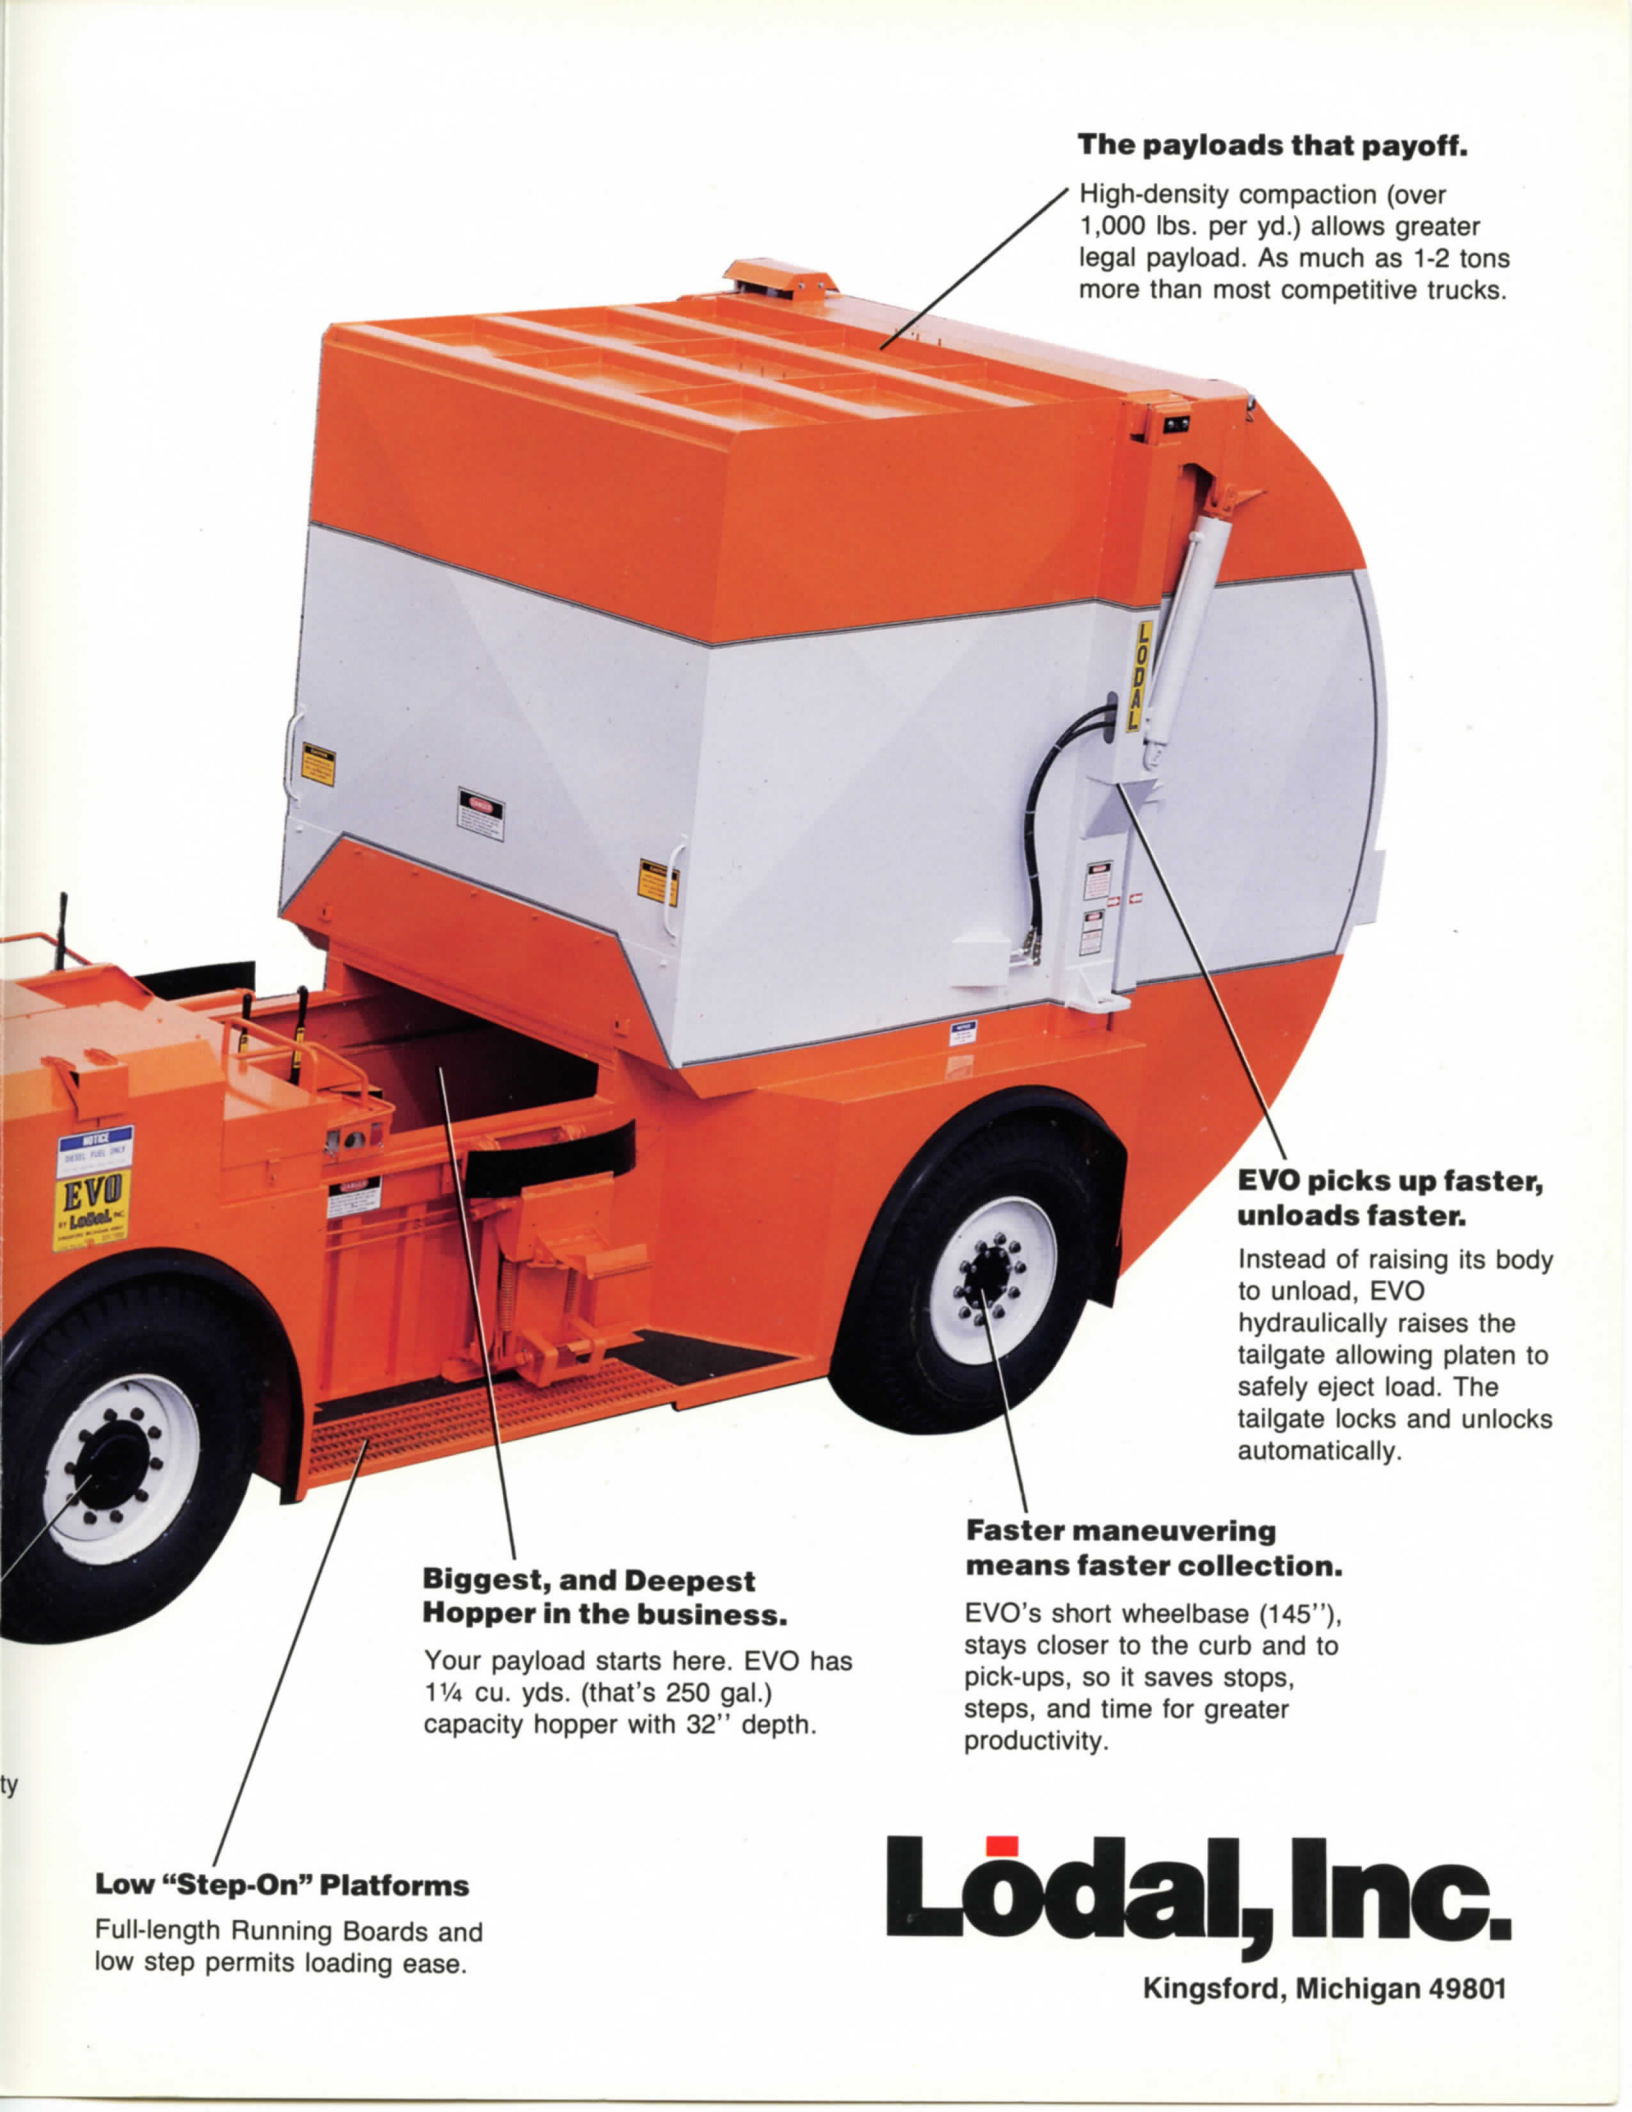

Front Axle Drive

Permits Deep Hopper and has proven durability

Low Cab Floor

Step-in & Step-out
Sliding Cab Doors

The payloads that payoff.

High-density compaction (over 1,000 lbs. per yd.) allows greater legal payload. As much as 1-2 tons more than most competitive trucks.

EVO picks up faster, unloads faster.

Instead of raising its body to unload, EVO hydraulically raises the tailgate allowing platen to safely eject load. The tailgate locks and unlocks automatically.

Faster maneuvering means faster collection.

EVO's short wheelbase (145"), stays closer to the curb and to pick-ups, so it saves stops, steps, and time for greater productivity.

Biggest, and Deepest Hopper in the business.

Your payload starts here. EVO has 1¼ cu. yds. (that's 250 gal.) capacity hopper with 32" depth.

Low "Step-On" Platforms

Full-length Running Boards and low step permits loading ease.

Lodal, Inc.

Kingsford, Michigan 49801

The EVO Kart System

EVO Kart Dumpers handle 80, 90 and 100 gal. body carts, with high speed and operator ease. Dump cycle averages 6 seconds with 500-700 daily home collection!. Another reason why EVO picks-up where the rear loaders leave off.

Lodal Side Loaders are more durable than any on the market today and we back it up with a two year warranty!
