Leach Dependability**

Leach Built

From Front Forks to Rear Door

Leach is out in front...

Leach Built Hydraulic Pump, same proven Leach Pump used in Leach Rear Loaders.

Automatic Tailgate Latching and Unlatching Operated Within Cab. No need for operator to leave cab... quick dumping.

Curb Side Door. Facilitates servicing, maintenance, and washdown. (street side door optional).

It's new...but it's proven. Leach Front Loader is the performing companion of the accepted line of Leach Rear Loaders.

The Leach Front Loader comes into the sanitation equipment industry with great assurance of high performance, craftsmanship, dependability and reliability.

Nearly 45 years of practical experience in the manufacturing of refuse collection equipment with an acceptance second to none.

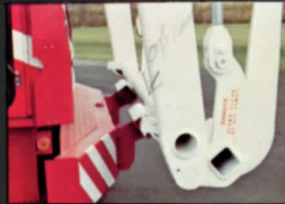

You always get what you expect from Leach... Leach engineering and design, on-the-job field

...with up front loading

Lifting Arms... 9,000 Pounds Lifting Capacity.

Patented Self-Leveling Forks. Features, parallelogram design. Forks are exclusive, simplified mechanical design, stay in alignment throughout container cycle.

Exclusive Lift Arm Supports. Transmits shock loads to chassis frame and not to body mounting. Provides support for lift arms while traveling.

Additional Features

■ Three-Stage Telescopic Packing/Push Out Cylinder.

Three stages means more stability when cylinder is fully extended... Minimum stages... maximum power... longer working life.

■ Two Side-Opening Top Doors.

Hydraulic cylinders open doors and hold doors closed during packing and ejection of load. Builds tighter loads. Minimizes blowing of material. (Automatic opening, optional)

■ Automatic Interlock With Dumping Cycle.

Arm lifting lever cannot be operated without packer plate being in "full forward" position. Operator can't dump load behind Packer Plate.

■ Adjustable Front Forks.

Can be readily adjusted to accommodate container up to 78 $\frac{1}{2}$ " wide.

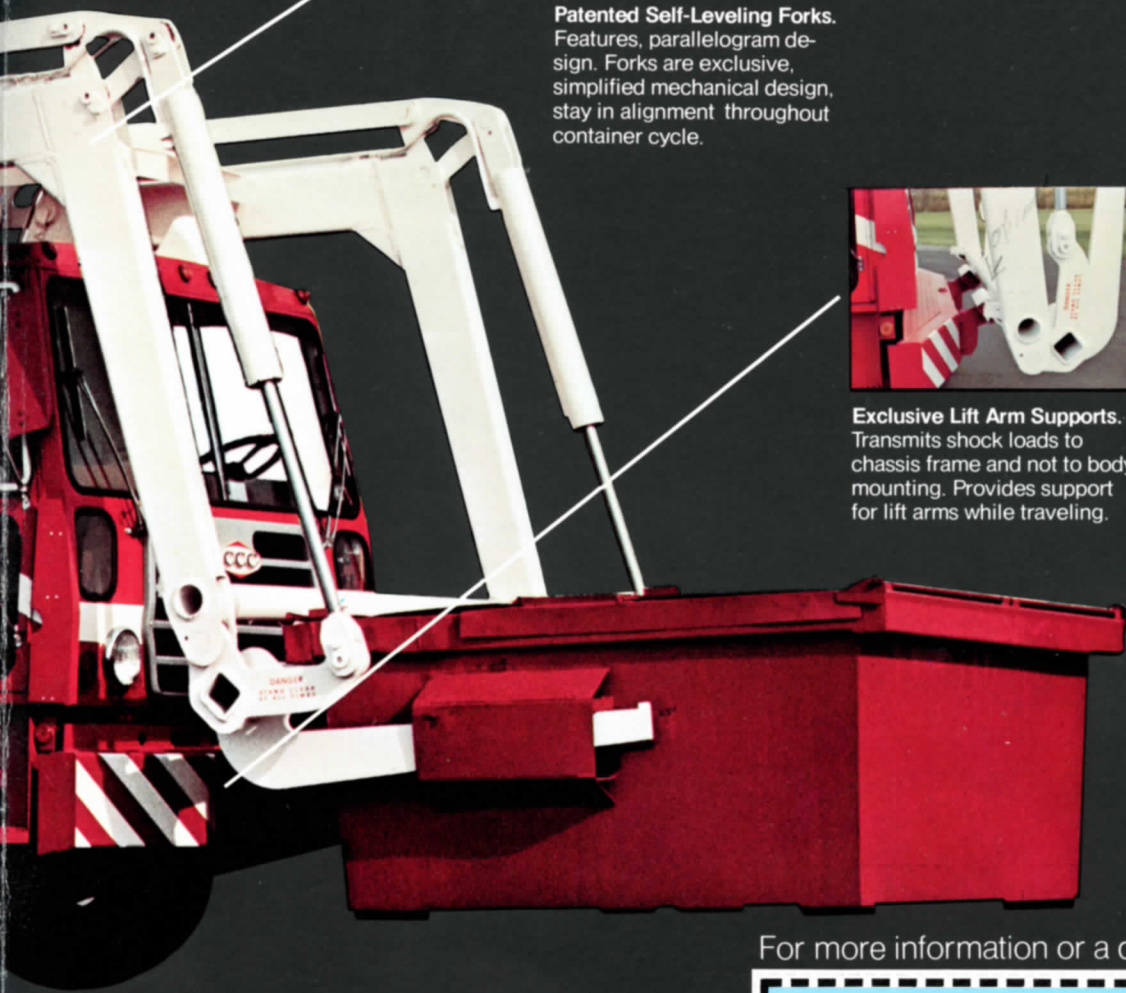

■ **Bridged Construction.** Body bridged at points of highest stress.

■ Cab-O-Scope (Optional)

Permits operator to observe overhead action of dumping of container.

■ Cab Protector (Optional)

Durable, expanded steel, shield protects top of cab.

testing, controlled quality manufacture, reliability and reputation, durability and ruggedness, with minimal maintenance... ability to get the job done!

Available in 25 and 31 cubic yard sizes, the Leach Front Loader provides two units for varying sizes of collection routes reducing the number of trips to the disposal site.

Leach builds into its Front Loader many ways to keep operating and maintenance costs to a minimum. It's rugged. Leach designs and builds a significant number of its components in its own plant assuring better quality control. *Leach's Goal: To build a quality front loader with the lowest over-all operating costs.*

Out in front...the Leach Front Loader

The LEACH Front Loader... typical of other durable, rugged LEACH refuse equipment... is built to do the work where front loaders are asked to perform with extra ability. LEACH Design, LEACH Power, LEACH Compaction, LEACH Dependability.
