

Leach...already accepted as best...
now even better!

the new

LEACH[®]
SaniCruiser

*America's most adaptable
refuse compaction unit*

Another precedent setting
breakthrough in Sanitation!

Built to meet the demands of today's economy

Today's ever increasing operating costs in solid waste disposal presents a tremendous challenge to the manufacturers of refuse equipment. Leach Company has met this challenge in the past with its industry-wide accepted Packmaster.

Today it is proud to release its latest answer to the solid waste

collection problem, the Leach SaniCruiser . . . the finest, most practically designed, lowest operating cost, collection vehicle to enter the American Sanitation scene.

Your Elgin Leach Distributor will be happy to answer any and all of your questions.

Huge, all usable 2 Cubic Yard hopper

Providing fewer packing cycles . . . less wear in parts . . . low, easy, two-man loading

Takes virtually all types of refuse

Household garbage . . . boxes, refrigerators, stoves, hot water heaters . . . the SaniCruiser gobbles it

NEW LEACH®

SaniCruiser

AMERICA'S MOST ADAPTABLE COMPACTION UNIT
DESIGNED FOR TODAY'S ECONOMY

Powerful Packer-Plate Crushing
Power... builds bigger payloads

... assisted by two, powerful single-stage double-acting cylinders. Breaks up and reduces the volume of refuse before it is compacted into the packer body!

Why the Leach SaniCruiser was innovated for you

Today's solid waste challenge

The success of any piece of heavy equipment is directly proportional to its ability to perform under rigorous on-the-job conditions.

The job of a refuse compaction unit in today's world of solid waste disposal is, at best, rugged.

In a growing number of towns and cities, the day of "separate collections" has given way to non-selective practices. Anything left to be collected is expected to be picked up the first time around . . . household garbage, tree limbs, boxes, crates, water heaters, refrigerators, etc.

On the commercial route, the demands are often even more strenuous. Today's compaction unit is expected to perform without "whimpering"—without complaint (and sometimes with uncalled-for abuse to it)—and it's expected to perform with a minimum of downtime.

Leach Company, in producing collection units, has—year in and year out—met these demands with its industry-wide accepted Packmaster units. As collection procedures changed, Leach correspondingly has always kept pace with these changes.

The solution

Consequently, Leach Company is proud to release its latest production model: the Leach SaniCruiser. Its new, Jumbo sized, 2-yard hopper (all usable) will take virtually any type of refuse, and requires fewer packing cycles. Its heavy-duty, extra rugged packer plate (assisted by two powerful single stage, double-acting hydraulic cylinders) features a breaking and crushing power that builds bigger and bigger payloads, *even by Leach standards*. And because of its simplified, job-proven engineering design, the maintenance factor of the new SaniCruiser will prove to be one of the lowest in the industry.

The new Leach SaniCruiser is superbly adaptable to meet the demands of today's solid waste economy and your Elgin Leach Distributor is ready and able to tell you about it.

Ask him.

Leach technology . . . continuous innovator in sanitation leadership

The industry asked for it...

A rugged compaction unit
with a 2 cu. yd. hopper
with minimum
down time to produce
maximum payloads
to successfully operate
in today's economy.

We supplied it:
