## Container Handling Devices

The most efficient rear-loader container handling system available! Quick, smooth, positive, efficient—simple to maintain. Works totally independent of packing cycle. Single overhead double-acting hydraulic cylinder, with capabilities to fit your day-to-day needs. Model ranges as follows:

- Model 1-2 — 1 to 2 yard containers
- Model 2-6 — 2 to 6 yard containers
- Model 1-6 — The complete range

## BASIC LOAD-MASTER LM-300 SERIES DATA

### Body

Floor ..... 11 gauge High Tensile  
 Sides ..... 11 gauge High Tensile  
 Roof ..... 11 gauge High Tensile  
 Understructure of Body — Full Width  
 Crossmembers Integral with Body Floor

### Tailgate

Hopper Floor ..... 1/4" High Tensile  
 Packing Plate ..... 1/4" High Tensile  
 Hopper Sides ..... 11 ga. High Tensile  
 Hopper Capacity ..... 2 cu. yds.  
 Loading Height ..... 4" Below Frame

**Note: Truck equipped with diesel engine requires variable speed governor.**

### Hydraulic Systems

27 G.P.M. Gear Pump  
 Multiple Balanced Spool-type valves with Adjustable Cartridge Relief  
 All Cylinders—Chrome plated  
 Plunger Rods
