**JET FULL-PAK** Thirty cubic yard capacity front end loader carries seven ton legal payload on two axles; provides easy, short-wheelbase maneuverability.

**FULL-PAK** Up to fifty-eight cubic yard capacity front end loader combines durability, high compaction ratio and low maintenance factor for efficient commercial, industrial and high-density residential operations.

**ROLL-OFF TRUCK FRAMES** Short or long frame models adapt to any make roll-off container; come in capacities to 15 tons and body lengths to 24 feet.

**SHU-PAK** High compaction side loader provides up to 12 tons of payload with 37 cubic yard body. Optional right-hand drive permits one man operation. Low pitch-in height and continuous loading during packing cycle saves valuable crew time.

**MAX-PAK** Stationary Refuse Compactors priced from \$1,195 are offered in sizes from 1/2 cubic yard to 5 cubic yard capacities for commercial and industrial use; Transfer stations feature stationary compactors up to 8 cubic yard for single or tandem operation.
