

NORBA FRONT LOADER

High Payloads through Technical Advances

NORBA FRONT LOADER

AUTOMATIC OPERATION

The NORBA FRONT LOADER can offer payloads in excess of 13 tons from a 30 ton g.v.w. chassis, with 4500 kgs capacity lift arms efficiently lifting containers up to 10 cubic yards. Its unique design maximises payload and ease of collection of industrial waste and materials for recycling.

Body sizes from 29 cubic metres and 30 cubic metres are available and suitable for most 3-axle and 4-axle chassis.

All operations are controlled from the cab. Adjustable forks and automatic operation of the packer plate are standard items.

It conforms to all Health and Safety Regulations, supported by an optional full maintenance contract.

Adjustable Front Forks — as standard
