

# Norba + Multilift

Offer the widest range of  
chassis mounted equipment  
for the handling and  
transporting of solid waste  
materials

# The Norba range..

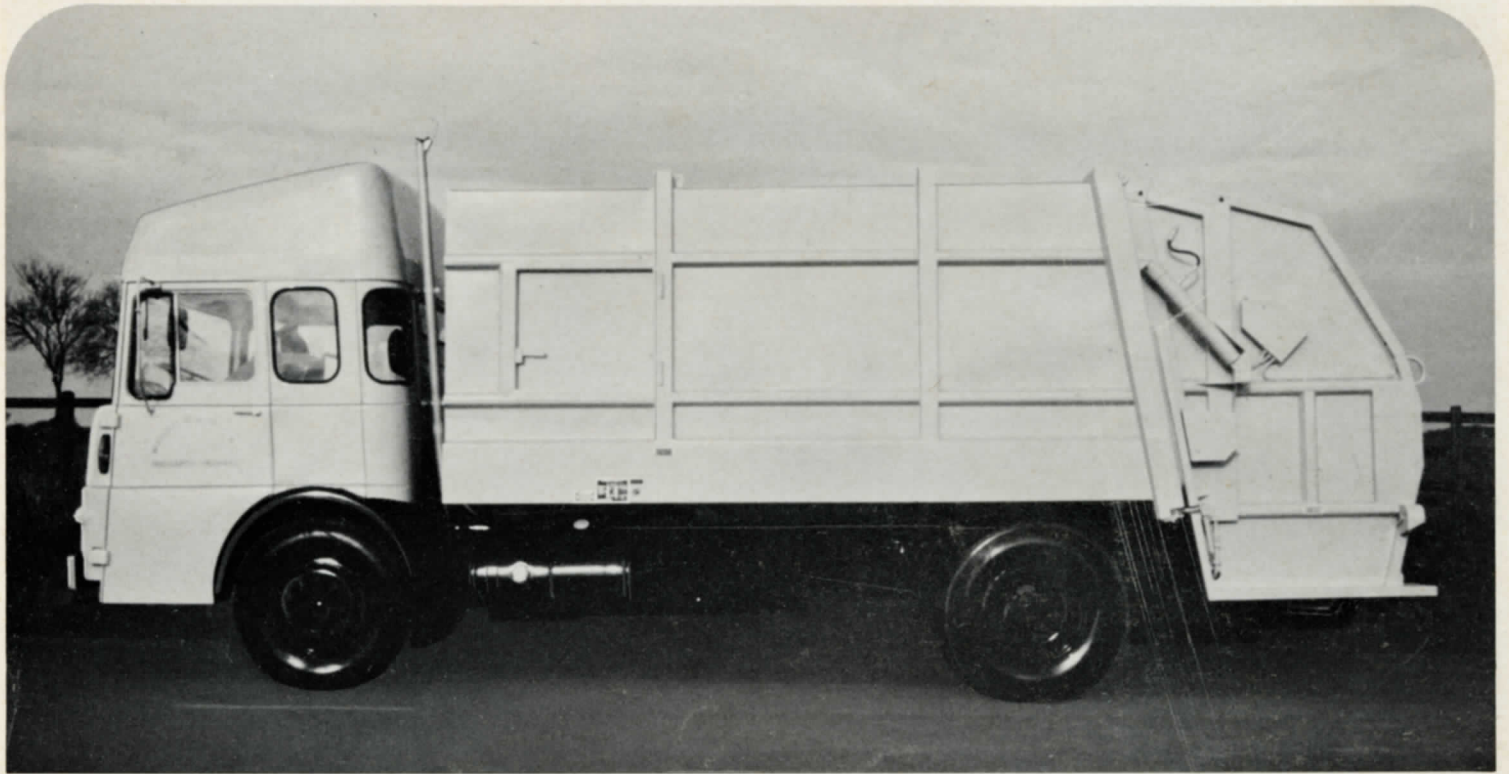

## **NORBA-FERRET**

**Intermittent Loading Refuse Collection Vehicle**

**Low Purchase Price  
High Compaction  
Body width only 80"  
Ejection Discharge  
Substantial Fuel Savings  
Open Back Hopper**

The Norba-Ferret is designed to negotiate those awkward back alleys and country lanes. The Intermittent Loading Hopper is equally efficient in handling town centre as well as domestic collections. With a compaction ratio of 3-5:1 you get a great pay load from the smallest Norba vehicle.

## **NORBA-HIPPO**

Intermittent Loading Refuse Collection Vehicle

**Large Capacity Hopper**  
**Unique Safety Controls**  
**Water Tight Seal Between Body and Tailgate**  
**Special Body Shock Absorbers**  
**Rubber Safety Curtain**  
**Weather Proof Controls**  
**Choice of Five Body Sizes**

Why take chances on safety when the Norba-Hippo is designed with the current Health and Safety Act in mind. Norba's unique controls and safety curtain eliminates risk to operators and on-lookers.

Take a close look at the Norba-Hippo and see for yourself the high performance and specification.

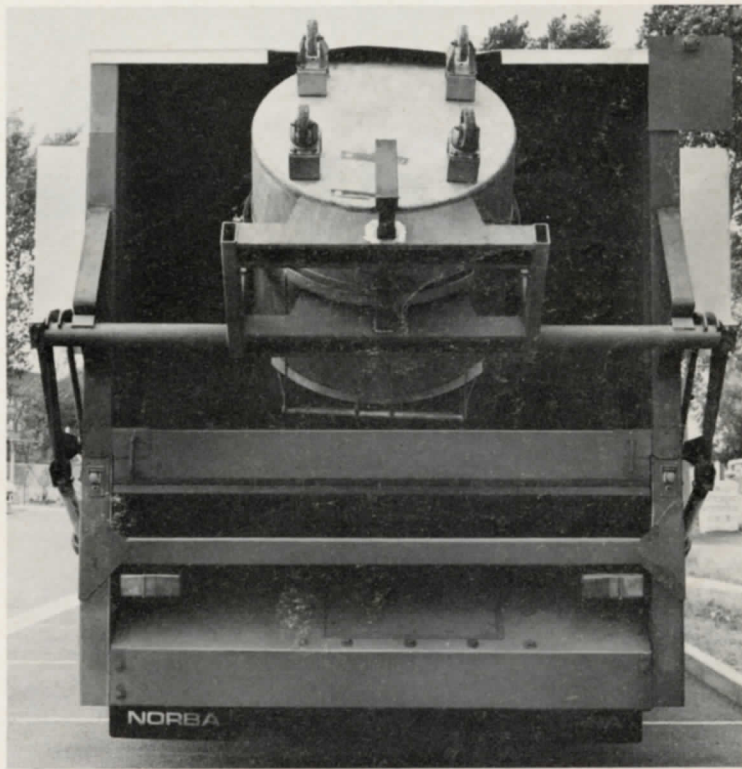

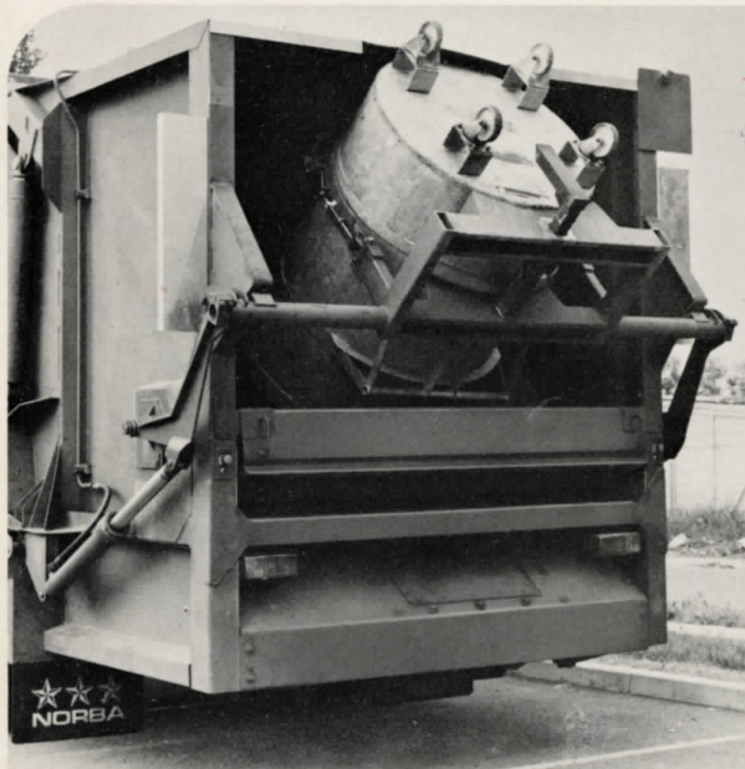

## **NORBA-CONSTRICTOR**

**Continuous Loading Refuse Collection Vehicle**

**High Legal Payload  
Pulverises Bags and Sacks  
Fast Continuous Loading  
Safe Ejection Discharge  
Wide Range of Municipal Chassis  
Maintenance Costs Minimised**

The Norba-Constrictor is renowned for its simple hydraulic operation resulting in less down time.

Simplicity also means fewer break-downs and lower maintenance costs. Like all Norba models the basic vehicle incorporates: Ejection Discharge — Vertical Exhaust — Rear Emergency Stop — Light in loading hopper. The Continuous Loading Refuse Collector Authorities have come to trust and rely on.

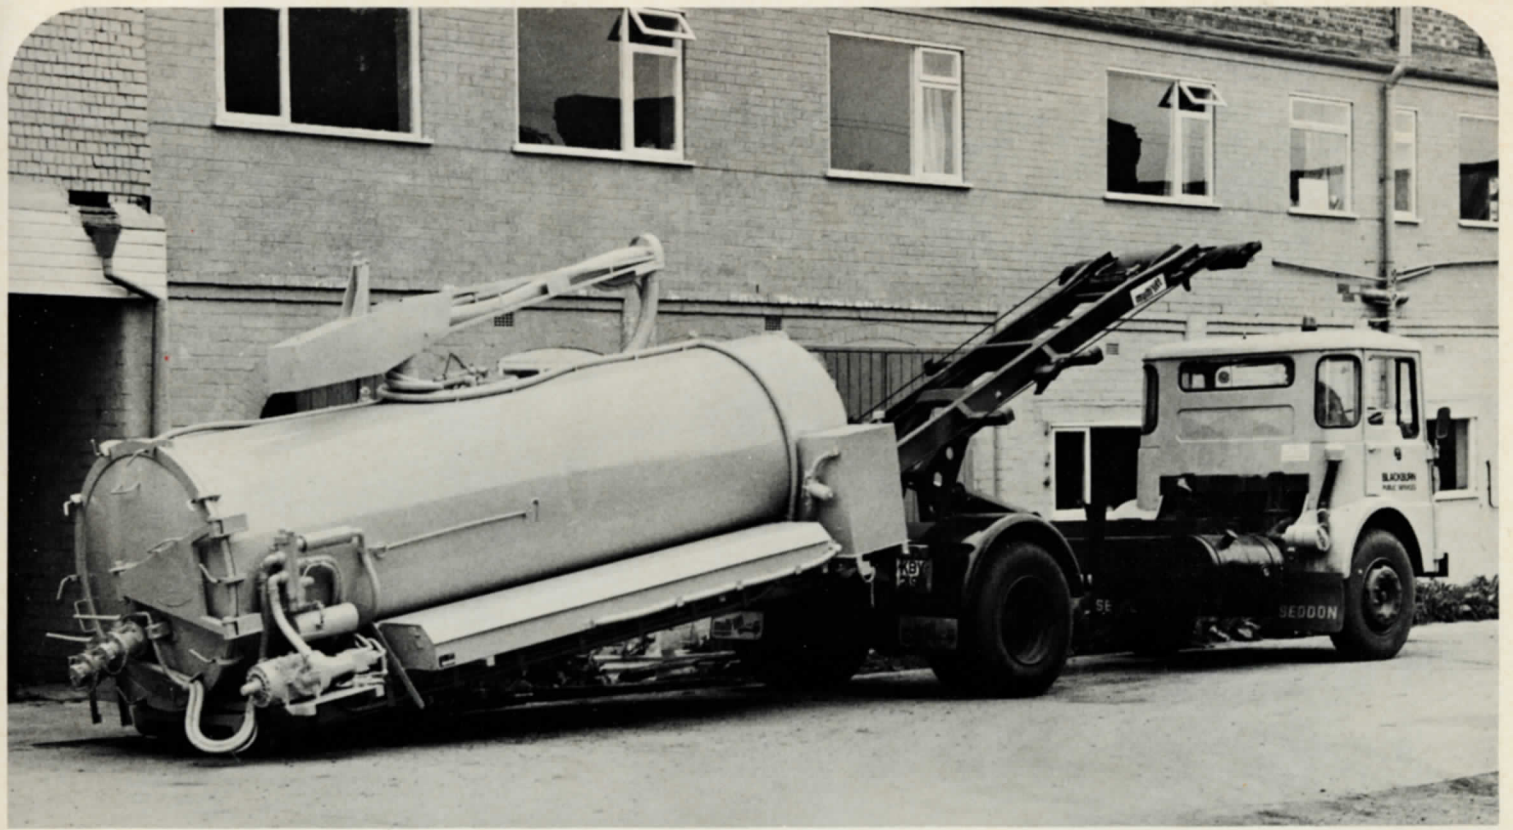

## CONSTRUCTOR BIN LIFT

The Dual Purpose Refuse Collection Vehicle

**Fast Container Handling**  
**Wide Hopper for Manual Loading**  
**Speedy Clearance of Hopper**  
**High Compression Ratio**  
**Low Unobstructed Hopper**

Based on the successful Norba-Constrictor, the Bin Lift Model offers the benefit of manual and container loading. The Bin Lift mechanism handles all British Standard  $1\frac{1}{4}$  cu. yd. cylindrical containers and folds neatly away to leave an unobstructed hopper with low loading height for manual loading. The Constrictor Bin Lift is a *real* dual purpose refuse collection vehicle.
