

THE LONG LONG LINE

PAK-MOR...
Traditionally the Best

DOING A BETTER JOB...

PAK-MOR
**SIDE
LOADERS**

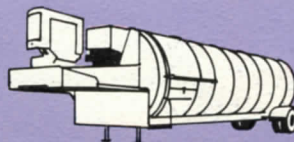

- Side Loaders ranging in size from 13 to 28 cubic yards featuring:
- Continuous welded body seams
 - Rapid traversing sweep action allowing faster route time (8 - 10 secs.)
 - Packing cylinder horizontally mounted utilizing all possible effective force for compaction
 - Overlap from 10 to 12" per sleeve - positive internal support
 - Heavy duty P.T.O. drive line needle bearings
 - Hard chrome surface on cylinder sleeves
 - Adaptable for use with PAK-MOR'S Handi-Lift Container System
 - Reduction in route time and down time meaning greater savings for PAK-MOR owners

**WHERE THE ACTION IS... THE WORK LOAD THE T
DELIVERING VERSATILITY, DEPENDA**

PAK-MOR
**TRANSFER
TRAILERS**

- Transfer Trailers range in size from 45 to 75 cubic yards featuring:
- Rigid deep drawn body construction with continuous welded seams
 - Faster loading through rapid traversing sweep cycle (18 - 20 secs.)
 - Packing cylinder mounted in horizontal plane utilizing all possible effective force for compaction
 - Overlap 22 to 24" per sleeve in addition to external guide support
 - Hard chrome surface of cylinder sleeves

LO-BOYE TRAILER

FRONT LO
AND CON

THROUGH BETTER DESIGN

REAR LOADERS

Rear Loaders are available in ranges from 13 to 25 yards featuring:

- Rigid deep drawn body construction with continuous welded seams
- Accelerated loading with big 1.8 yard to 3 yd. hoppers
- Maximum mechanical moment allowing efficient compaction geometry
- Heavy duty P.T.O. drive line with needle bearings
- Bigger loads faster
- Ejection panel cylinder overlap 8 - 10" per sleeve — positive internal support
- Designed for reduced maintenance expense

Toughest ... IS PROMINENT ON THE SCENE
ABILITY, ECONOMY — THE ANSWERS!

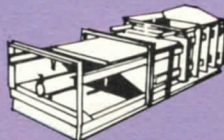

FRONT LOADERS

Front Loaders range from 20 to 32 yard capacities featuring

- Rigid deep drawn body construction with continuous welded seams
- Lift capacity of 3000 and 6000 lbs.
- Main lift cylinder trunnion mounted minimizing cylinder rod column loading
- Control lights indicating position of packer plate, top door, and container in the dumping arc to control operation
- Overlap from 10 to 12" per sleeve — positive internal support
- Heavy duty P.T.O. drive line with needle bearings

Lo Boye TRAILERS

LoBoye Trailers range from 28 to 38 cubic yards featuring:

- Continuous welded body seams
- Rapid traversing sweep action allowing faster route time (10 - 12 secs.)
- Packing cylinder mounted horizontally — utilizing all possible effective force
- Overlap from 22 to 24" per sleeve in addition to an external guide support
- Hard chrome surface on all exposed cylinders
- Increase maneuverability and adaptable for use with PAK-MOR'S Handi-Lift Container System 1½ - 4 yards size

PAK-MOR'S

BALANCED DESIGN AND CRAFT-MANSHIP OFFERS . . . THE RIGHT JOB POWER FOR THE RIGHT JOB. POWER-PACKAGED IN A RUGGED BODY PROVIDING LONG TERM RELIABILITY AND LOWER OPERATING COST.

*PAK-MOR
Quality:*

Balanced Design puts the most efficient power package in a rugged body for a long term return on your investment! Hydraulic systems are engineered to highest quality; components matched to retain this high quality and the density of PAK-MOR loads show how this scientific, engineered combination works for you! One demonstration will tell the whole story!

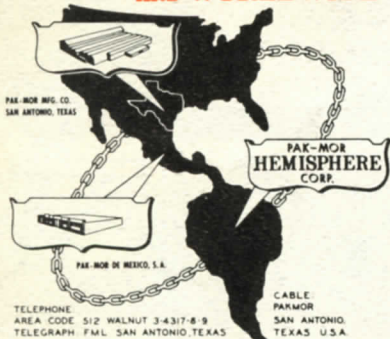

*PAK-MOR
Construction:*

Rugged! Built to last the day in day out service you want — year after year! Check the PAK-MORs in operation near you — you'll find this is a unit built to last and outlive many truck chassis! PAK-MOR Construction gives you an investment with a future!

*PAK-MOR
Job-Ability:*

For Every Refuse Problem . . . there's a PAK-MOR Solution! Side Loaders, Rear Loaders, Container Systems, Transfer Trailers or Incinerator Trailers — All are part of the PAK-MOR Complete Approach to Sanitation Problems. Acceptance is based on Performance — and PAK-MOR gives you lowest cost operation available, we'll be glad to show you how!
