Municipal Bins & Sackholders

plastic dustbins

Two distinct types of plastic bins are marketed by Shelvocke and Drewry Limited. These are the 'HDP' series for heavy municipal use, of blow moulded construction available in $2\frac{1}{2}$ cu/ft (0.07 cu/m), $3\frac{1}{2}$ cu/ft (0.09 cu/m) and 4 cu/ft (0.11 cu/m) capacities. Also available in $3\frac{1}{2}$ cu/ft (0.09 cu/m) capacity is the popular 'New Starlite' bin of lightweight construction providing easy handling with inherent strength.

Both types feature heavy duty one piece bonded lifting handles and are tapered to facilitate nesting.

plastic sackholders

Following the trend towards the widespread use of sackholders, Shelvocke and Drewry Limited, offer a choice of types and capacities.

The 'Startub' sackholder available in $3\frac{1}{2}$ cu/ft (0.09 cu/m) or 4 cu/ft (0.11 cu/m) capacities is fitted with integral lifting handles on the $3\frac{1}{2}$ cu/ft model, with hand recesses on the 4 cu/ft model and a 5" (127mm) diameter hole in the base to prevent condensation.

The $3\frac{1}{2}$ cu/ft (0.09 cu/m) and 4 cu/ft (0.11 cu/m) 'Appollo' sack holders are of advanced design featuring a fully open base and reverse tapered sides to allow for discharge of the full sack by raising the sackholder body. Lifting is facilitated by hand recesses and in common with the 'Startub' types, 'Rubbertex' lids are supplied.

B.S.S.

galvanised dustbins

The 'B.S.S.' range of bins designed for ease of handling, feature tapered sides to allow for easy nesting—resulting in an important space saving.

To ensure maximum strength, heavy duty lifting handles are fitted and bins are galvanised after construction to give a long trouble free life.

Three capacities are offered, 2 cu/ft (0.05 cu/m), $2\frac{1}{2}$ cu/ft (0.07 cu/m) and $3\frac{1}{2}$ cu/ft (0.09 cu/m).

choice of lids

To facilitate standardisation, a complete range of 'Rubbatex' pattern heavy duty rubber lids are available for all SD Municipal bins and sackholders. Flexible and of light weight yet strong and silent in use, 'Rubbatex' lids provide the answer to trouble free service.

Standard galvanised pattern lids are also available, primarily for use with 'B.S.S.' bins.

Type of lid should be specified when ordering.
