

REY SUPERPAC BR

SEMAT

SUPERPAC BR: the best investment

Take a good look at a SUPERPAC at work.

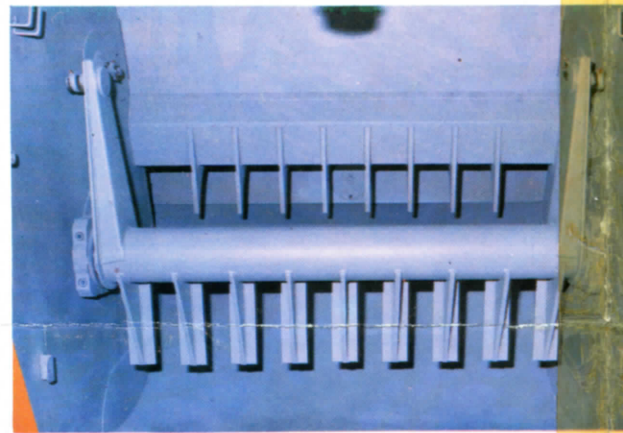

Its ram is not a heavy, noisy cram-shovel (click, it pushes in; clack, it comes back), but a mobile comb, rotating in the loading hopper five times a minute. It is quieter, lighter and more versatile ... a bit like a pitchfork, in fact. The components are mechanically very straightforward: a mobile comb, a second fixed comb at the mouth of the body and a mobile shield wall inside the body itself. Four successive compressions, five times a minute:

- first compression from the mobile comb,
- second compression by the interaction of the refuse,
- third compression in the loading tunnel where the refuse is packed and pressed,
- fourth compression by crushing against the mobile shield wall. The wall keeps the refuse permanently under pressure throughout collection and prevents it from re-expanding.

The refuse is shredded by the teeth of the mobile comb under the fixed comb. No refuse-sack or packaging, however big, can stand up to it.

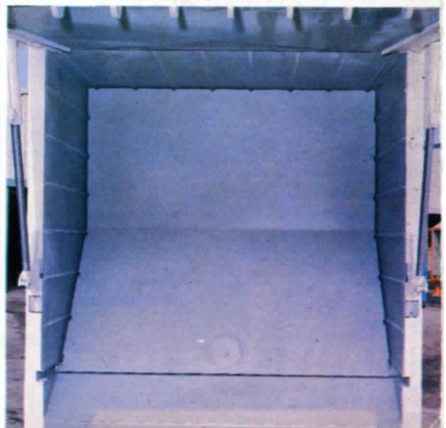

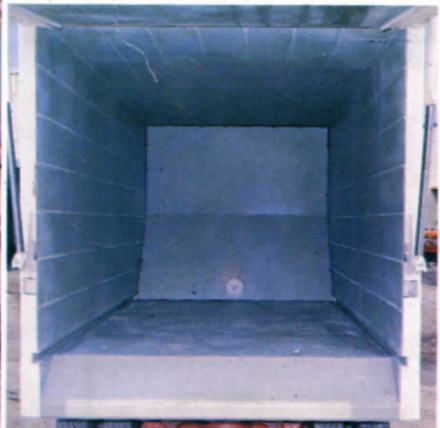

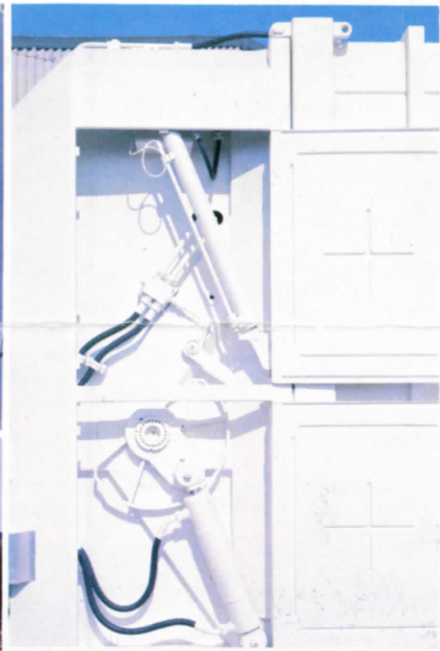

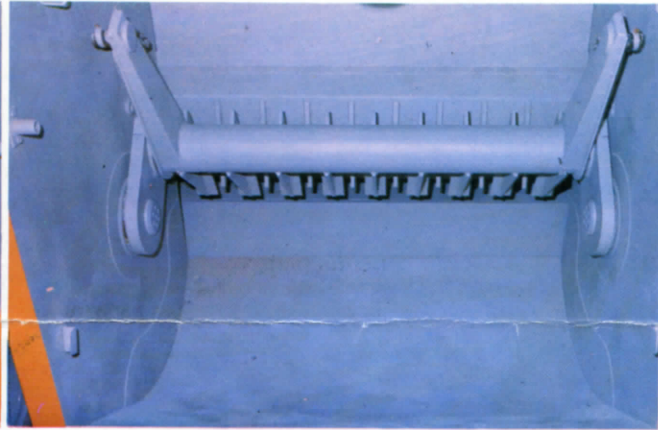

Emptying: open the rear door; the shield wall advances. Everything is ejected in a matter of seconds, without tipping the bin.

The only thing that matches the compression on a SUPERPAC is the simplicity!

for the cleanliness of your town.

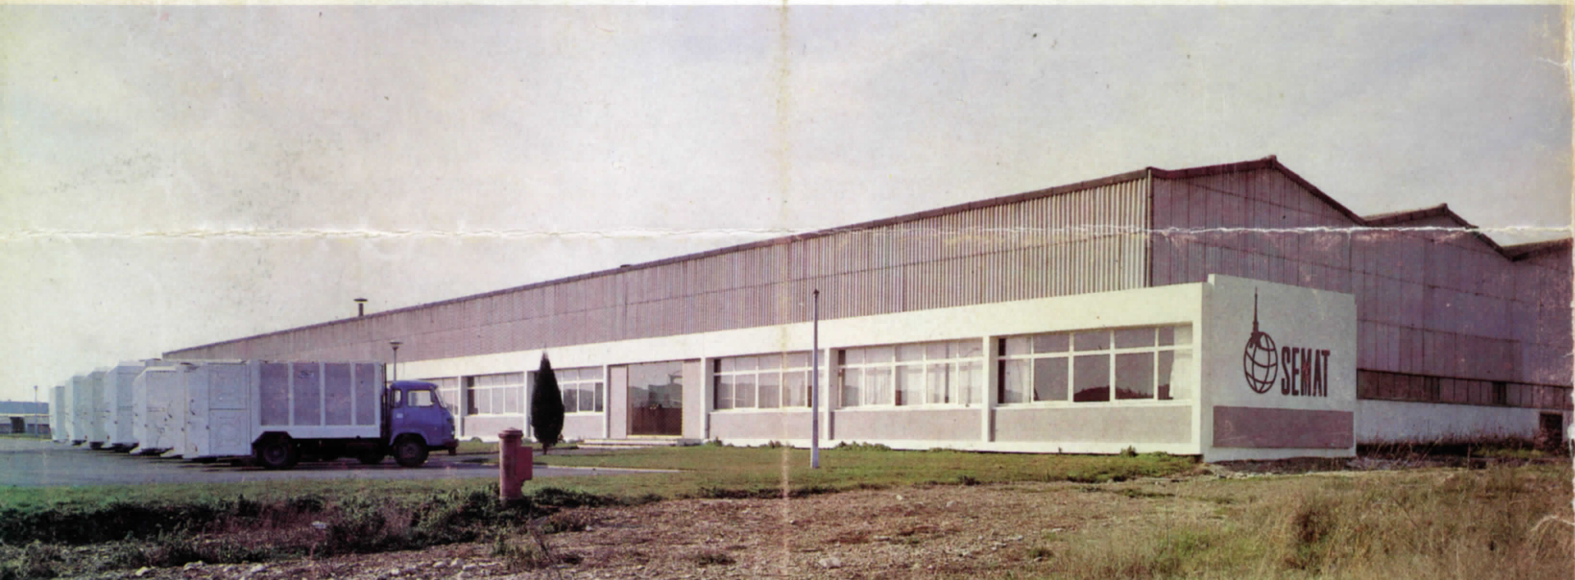

SUPERPAC BR. A complete range of equipment from 6 cubic metres geometric volume (212 cu.ft.) up to 24 cubic metres (847 1/2 cu.ft.)
 Average compression ratio: 5 or 6
 Fitting up of all chassis thermic or electric from 8 tonnes to 26 tonnes (Total Laden weight)
 Fitting of mechanical dustbin or container lift on demand.

Designed in FRANCE the SUPERPAC bin is now manufactured under **REY-SEMAT** licence in many countries. Overall annual production: approximately 1800 units. The equipment's quality is guaranteed by the extent of the design, manufacturing and test facilities at SEMAT's LA ROCHELLE plant. After-sales service in France at 12 regional SEMAT centres.

40 YEARS EXPERIENCE TO OFFER TOWNS AND CONTRACTORS.

SEMAT'S MANUFACTURING PLANT IN THE LA ROCHELLE INDUSTRIAL ZONE

PUBLIC COMPANY. Capital 7 993 260 Frs - SIRENE 778 128 462 TELEX: SEMAT PARIS 610 071.
