

# REFUSE PACKER BODIES

# Truxmore CHASSIS SPECIFICATION SHEET

Save up to 15% on chassis costs with Truxmore Refuse Packer Bodies. A curved surface is inherently stronger than a flat surface. That's why Truxmore's cylindrical body is exceptionally strong and durable, and yet weighs significantly less than a square packer body of comparable rated capacity. With Truxmore you haul bigger payloads on a smaller chassis.

Truxmore offers a complete line of hydraulic refuse packer bodies for hand loading or container loading. Hand loaders range in size from small, maneuverable 10 yard units up to 27 cubic yard models. Fast, efficient container loaders available from 18 to 27 cubic yard units with a wide selection of container sizes.

Truxmore 10 for all around duty and special pick-ups

Truxmore hand load models provide the lowest loading height of any side loading refuse packer

The versatile Truxmore Container Loader operates equally well for hand loading or container pick-up

<b>TRUXMORE REFUSE PACKER CHASSIS SPECIFICATIONS</b>
