## 5 GREAT PACKER BODIES

IN 9 PRACTICAL SIZES

### Rear Loading GRUNCHER™

Unique full rotary auger rips, tears, breaks and crushes *all* forms of refuse — household and industrial. A real engineering break through in rugged simplicity. One simple hydraulic motor and gear reducer permits the GRUNCHER™ to pack continuously — No waiting. Simplicity of packing mechanism almost eliminates maintenance and reduces dead weight of tailgate overhang. The GRUNCHER has the best weight distribution of any rear loader on the market. Container lifters to dump up to 10-yd. cans. Body sizes in 16, 20 and 25 yard capacities.

### Rear Loading ROYAL GT®

The Standard of the small rear loading market. Both 10 and 14 yard body capacities use the time proven back-hoe packer blade crushing system. Oversize cylinders give a whopping 36,000 pound packing force. Either manual or fully automatic blade cycle controls. Low body silhouette for the trim look and low center of gravity. Sold around the world in 30 countries.

# DESIGNED, ENGINEERED AND PRODUCED; NOT TO BE "JUST GOOD" AND NOT TO BE "JUST COMPETITIVE" BUT TO ESTABLISH WORLD- WIDE STANDARDS FOR ON-THE-JOB EXCELLENCE

## The Versatile SATELLITE PUP®

The coming system!! Let the small, economical, quick and light SATELLITE PUP fetch after refuse. When full, it runs to mama and transfers the load — then back for more.

The SATELLITE's body raises during transfer to join with the rear loading hopper lip, then lowers to give a convenient loading height. Loads from either side. Rear door raises straight up to any height so operator can meter the refuse into the rear loader hopper. No clogging. No spilling. A great little unit. Usually packs 1800 pounds into the high strength 5½-yd. body.

## The Unique PUP®

The hefty little PUP fits nicely on a standard ¾ ton pickup truck (8,200 to 10,000 pound GVW) chassis. This small and agile unit scoots around anywhere. The PUP body rolls-on or rolls-off a pickup bed for storage or to use as a stationary packer. Packs up to 2,000 pounds of refuse in the 6-yd. body each trip.

## Side Loading MIGHTY/PACK®

The economical mid sized body for the "one man" operation. Easy loading from either side with dual packer blade controls. Simple, powerful double acting cylinder powers blade through a rugged scissors type actuator. A time proven body design with 11 years of successful sales. Model 710 has 10-yd. total body volume. Model 1014 gives you a full 14-yd. volume.
