AMERICA'S TOUGHEST WITH THE BIGGEST PAYLOADS
Here's the newest big one, reaching new levels of performance measured in every functional way. Here's the most rugged body ever built using steels at strengths rated beyond those ever before used in a packer body construction. Here is compaction of a thousand pounds per cubic yard achieved with greater reliability and taking most any type of non-combustible refuse. Here is more hopper capacity and new efficient cycle speed. Here is the Formula that combines bigger payloads with less body weight distributed better on the chassis. Get the maximum allowable payloads at lower operating expense. Get bigger payloads, faster operation, greater reliability and efficiency in the unit that's quickly becoming the industry's leading big packer. The Formula 5000 is ready to outproduce any other unit, where it counts—on the route.

No packer body comes to the job more ready to work harder, faster, longer. The Formula 5000 offers a huge, usable three yard hopper, a packing cycle time of half a minute and a fast reload time of just nine seconds. New concepts in packing geometry and Heil's high performance, high pressure hydraulics provide the compaction strength. The 5000 is the Formula body totally capable of collecting industrial refuse, commercial and container pick-ups or any mixed route.

**Operating Efficiency**

The Formula 5000 changes some old ideas. More capability doesn't have to mean more iron. The Formula 5000 body weighs in at least 13,000 pounds—at least a half-ton less than any other body that can approach it in capacity and payload. The Five Thou's lower body weight is placed more efficiently on the truck chassis. With the center of gravity moved forward, tire wear is improved and both operating and maintenance is significantly affected.

In building the Formula 5000, Heil actually adds extra strength compared to other bodies while removing unneeded weight. At points of tested stress Formula 5000 tailgate sides, hopper bottoms, packing panels and other key components—three-sixteenth High Tensile steel with a 165,000 PSI strength rating is used. In taking a proven big packer concept as the first step, Heil looked for even more ways to build in greater service life. In Heil plants, the Formula 5000 now take shape in the industry's most precise fixtures. Getting consistent dimensional accuracies contributes to body life. Heil doesn't compromise when it comes to tooling and the equipment necessary to maintain quality standards. In design, material selection and manufacturing craftsmanship, Formula 5000 deserves its standing at the top of Heil new packer body line-up.

For complete specifications contact your Heil distributor or Heil Solid Waste Systems Division, P.O. Box 8676, Chattanooga, TN 37411.

All designs, specifications and components of the equipment described above are subject to change at the manufacturer's sole discretion at any time without advance notice. Data published herein is informational in nature and shall not be construed to warrant suitability of the unit for any particular purpose as performance may vary with the conditions encountered. The only warranty applicable is our standard written warranty for this body.
## FORMULA 5000 REAR LOADER 1980 SPECIFICATIONS

### BODY SIZE
- **Overall Length** (includes 7 in. (177.8mm) cab clearance): 224½ in. (5702.3mm) | 239½ in. (6083.3mm) | 272½ in. (6921.5mm) | 313½ in. (7962.9mm)
- **Overall Width**: 96 in. (2438.4mm) | 96 in. (2438.4mm) | 96 in. (2438.4mm) | 96 in. (2438.4mm)
- **Over Height** (above chassis frame): 94 in. (2387.6mm) | 94 in. (2387.6mm) | 94 in. (2387.6mm) | 94 in. (2387.6mm)

### TAILGATE
- **Loading Sill Height** (below chassis frame): 5⅜ in. (134.9mm) | 5⅜ in. (134.9mm) | 5⅜ in. (134.9mm) | 5⅜ in. (134.9mm)
- **Hopper Loading Width**: 80 in. (2032.0mm) | 80 in. (2032.0mm) | 80 in. (2032.0mm) | 80 in. (2032.0mm)
- **Hopper Loading Height Opening**: 53⅔ in. (1358.9mm) | 53⅔ in. (1358.9mm) | 53⅔ in. (1358.9mm) | 53⅔ in. (1358.9mm)
- **Hopper Capacity (TBEA Rated)**: 2.75 yd³ (2.103m³) | 2.75 yd³ (2.103m³) | 2.75 yd³ (2.103m³) | 2.75 yd³ (2.103m³)
- **Hopper Capacity Water Level**: 1.4 yd³ (1.070m³) | 1.4 yd³ (1.070m³) | 1.4 yd³ (1.070m³) | 1.4 yd³ (1.070m³)

### CHASSIS REQUIREMENTS
- **C/A Single Axle Chassis**: 124 in. (3149.6mm) | 126 in. (3200.4mm) | 156 in. (3962.4mm) | 197 in. (5003.8mm)
- **C/T Tandem Axle Chassis**: 108 in. (2743.2mm) | 40,000 lbs. (18,143.6 kgs) | 50,000 lbs. (22,679.5 kgs) | 55,000 lbs. (24,947.5 kgs)
- **Recommended GVW**: 37,000 lbs. (16,782.8 kgs)

### STEEL TYPE AND GAUGE
- **Body Sides**: 11 ga. high tensile (3.038mm) — 50,000 PSI (3,515.4 kgs/cm²)
- **Body Roof**: 10 ga. high tensile (3.416mm) — 50,000 PSI (3,515.4 kgs/cm²)
- **Body Flooring**: 7 ga. high tensile (4.554mm) — 50,000 PSI (3,515.4 kgs/cm²)
- **Body Longitudinal**: 7 ga. high tensile (4.554mm) — 50,000 PSI (3,515.4 kgs/cm²) 6 in. channel
- **Floor Support Members**: 7 ga. high tensile (4.554mm) — 50,000 PSI (3,515.4 kgs/cm²) 7 in. channel
- **Tailgate Sides**: 7 ga. high tensile (4.554mm) — 165,000 PSI (11,600.6 kgs/cm²)
- **Tailgate Hopper Bottom**: ¾ in. high tensile (4.763mm) — 165,000 PSI (11,600.6 kgs/cm²)
- **Packing Panel**: ¾ in. high tensile (4.763mm) — 165,000 PSI (11,600.6 kgs/cm²)
- **Deflector Panel**: ¾ in. high tensile (4.763mm) — 165,000 PSI (11,600.6 kgs/cm²)
- **Ejector Panel**: 11 ga. high tensile (3.038mm) — 50,000 PSI (3,515.4 kgs/cm²)

### CYLINDERS
- **Tailgate Raise Cylinder**: 3 in. (76.2mm) bore x 27 in. (685.8mm) stroke
- **Compaction Cylinder (outside)**: 5 in. (127mm) bore x 36 in. (914.4mm) stroke
- **Compaction Cylinder (inside)**: 5 in. (127mm) bore x 20 in. (508mm) stroke
- **Ejection Cylinder 5000-18**: 4 in. (101.6mm) bore x 93 in. (2362.2mm) stroke
- **Ejection Cylinder 5000-20**: 5 in. (127mm) bore x 93 in. (2362.2mm) stroke
- **Ejection Cylinder 5000-25**: 6 in. (152.4mm) bore x 93 in. (2362.2mm) stroke
- **Ejection Cylinder 5000-20**: 4 in. (101.6mm) bore x 107% in. (2733.7mm) stroke
- **Ejection Cylinder 5000-25**: 5 in. (127mm) bore x 107% in. (2733.7mm) stroke
- **Ejection Cylinder 5000-25**: 6 in. (152.4mm) bore x 107% in. (2733.7mm) stroke
- **Ejection Cylinder 5000-25**: 4 in. (101.6mm) bore x 131% in. (3343.3mm) stroke
- **Ejection Cylinder 5000-25**: 5 in. (127mm) bore x 131% in. (3343.3mm) stroke
- **Ejection Cylinder 5000-25**: 6 in. (152.4mm) bore x 131% in. (3343.3mm) stroke

### PUMP TYPE AND DESCRIPTION

- **Type-Working Pressure**: 2500 PSI (175.77 kgs/cm²)
- **Working RPM**: 1350 RPM
- **GPM at Working RPM**: 26 GPM (98.4 liters/min.)
- **Input HP at working RPM**: 45 HP

### OIL RESERVOIR

- **Oil Requirement**: Mobile D.T.E. 13 Hydraulic Oil or equivalent
- **Tank Capacity**: 26 gallons (98.4 liters)
- **Tank Description**: Pair of 6 in. x 8 in. x 78½ in. (152.4mm x 203.2mm x 1933.9mm) rectangular tubes — ⅜ in. (4.763mm) thick
- **Oil System Gross Capacity**: 36 gallons (136.3 liters)
- **Oil Filters**: 100 mesh (140 micron) brass-suction line replaceable. 10 micron (replaceable paper element) return line with by-pass.
- **Shut-Off Valve**: Gate valve in suction line between pump and reservoir.

### VALVES

- **Type**: Packing Control Spool Type — Ejector and Tailgate Raise Spool Type

### OPERATING CONTROLS

- **Packing**
- **Tailgate Raise**
- **Ejector**
- **P.T.O.**
- **Signal Buzzer Switches**
- **Engine Speed Up**

- **Rear right side of tailgate**
- **Front left corner of body**
- **Front left corner of body**
- **Inside cab**
- **One each side of tailgate**
- **Front left corner of body**

### CYCLE TIME

- **Complete Cycle**: 28-32 seconds
- **Reload Time**: 9-11 seconds

---

**Note**: Specifications are subject to change without notice.
